

Recording Plant Responses

Experiment 1: Phototropism of a Bean Seedling (Lathyrus sativus)

Problem: How do plants respond to environmental stimuli?

Procedure:

1. Grow seedlings in the dark.
2. Observe the effect of light on the growth of the seedling. Place four seedlings in pots that are illuminated in the direction of their light source. The other four seedlings are in pots that are illuminated from the other side. Observe the growth of the seedlings in the direction of the light source. Record the growth of the seedlings in the direction of the light source.
3. Observe the effect of gravity on the growth of the seedling. Place four seedlings in pots that are illuminated in the direction of their light source. The other four seedlings are in pots that are illuminated from the other side. Observe the growth of the seedlings in the direction of the light source. Record the growth of the seedlings in the direction of the light source.
4. Observe the effect of gravity on the growth of the seedling. Place four seedlings in pots that are illuminated in the direction of their light source. The other four seedlings are in pots that are illuminated from the other side. Observe the growth of the seedlings in the direction of the light source.
