Matlin, Jane Maienschein, Manfred D. Laubichler, 2018-01-19 Although modern cell biology is often considered to have arisen following World War II in tandem with certain technological and methodological advances in particular the electron microscope and cell fractionation its origins actually date to the 1830s and the development of cytology the scientific study of cells By 1924 with the publication of Edmund Vincent Cowdry s *General Cytology* the discipline had stretched beyond the bounds of purely microscopic observation to include the chemical physical and genetic analysis of cells Inspired by Cowdry s classic watershed work this book collects contributions from cell biologists historians and philosophers of science to explore the history and current status of cell biology Despite extraordinary advances in describing both the structure and function of cells cell biology tends to be overshadowed by molecular biology a field that developed contemporaneously This book remedies that unjust disparity through an investigation of cell biology s evolution and its role in pushing forward the boundaries of biological understanding Contributors show that modern concepts of cell organization mechanistic explanations epigenetics molecular thinking and even computational approaches all can be placed on the continuum of cell studies from cytology to cell biology and beyond

**Modern Color/Modern Architecture** William W. Braham,2019-05-29 This title was first published in 2002 This really is a text that will fill a long felt want A key figure in that history is Am d e Ozenfant painter critic and friend of Le Corbusier who in the first half of this century founded a school in London where he conducted experiments and wrote about color in architecture Those experiments have been reconstructed for the book which also includes reprints of his most important articles on the subject This book provides a fascinating survey of this most contemporary topic that will inspire and inform designers and architects Color has often been regarded as the final dressing of a building subject to the vagaries of fashion and left to the client to select There have been a number of studies of polychromy in the architecture of the more distant past particularly in relation to modern conservation practices but there is little or nothing on the architectural color of recent times and especially within Modernism     *DAT* Aftab S.
