

What Are SAP End User Manual

It is the same for every other modules although here I reference it mainly for SAP HR.

- 1) You should understand which targeted group for the end-user training is for. Do they have any computer background or not.
- 2) In what way they are going to make use of the manuals supplied to them during the course of training.

Let us focus on how to prepare manuals:

In the client side, End Users are not permanent. If they get any better job outside they will resign and go out. Even if you train them well, again the end-user team disappears after some time. That is why implementing company(Client) expects SAP Consultants to prepare documents which are self explanatory (even to a layman in SAP) and study themselves and use the sap easy access very comfortably.

Hence we should prepare a document which explains the following things comfortably:

A) All the buttons and Screens we have in sap and its importance for an end-user.

B) All the transaction codes used by end user.

C) The STEP by STEP usage methodology with screen shots and explanatory foot notes for each Transaction code.

D) Prepare a book a table and columns which should have the following information:

- Sl.NO
- Transaction Code
- Navigation path
- Use of the Code
- Expected Result
- Achieved Result
- Remarks/Any Comment

E) Highlight the common troubles during the usage of SAP by an end- user and give the solutions (ready to use)

These problems you can come across while giving the in house training for the end-users. You just place them at one place and publish it for their usage in future for any of their new joinces as an end-user.

F) Every consultant is aware that the entire Organisational Management is with end user only. Means consultant should train the end user in entire OM.

G) We should inform the importance of info types and usage for our purposes at expert mode, PA30, PA40 etc.,
