Integrating SAP CRM with the SAP R/3 HR module

## Summary

An organization that has an active HR module, and a SAP CRM system in operation, would be likely to want employee data from R/3 to be maintained in CRM as well. This can be applied in a scenario where an employee of a company is also a business partner to the company in some capacity (purchaser of goods/services, etc).

To enable seamless transfer of employee data between the subscribing system (R/3) and the publishing system (CRM), an Application Linking and Enabling (ALE) needs to be setup and maintained between these two systems. The ALE would provide real-time integration of the data transfer process from R/3 to CRM. So, whenever an employee is created or employee details are modified in R/3, the employee record or changes to an existing record will flow to the CRM system. SAP standard IDocs are used as a vehicle for data transfer.

This document provides a detailed step-by-step guide of all the transactions and configuration settings that are required for ALE integration of the 2 systems.

The following SAP notes have been consulted in preparation of this document –

## **Sap R3 Hr Organization Management Manual:**

Common SAP R/3 Functions Manual William Lawlor, 2004 R 3 is a business system that has gained global prominence. However, the SAP R 3 has 237 000 function modules. Quite often, programmers are unaware that a module exists which can be of help in their programs. This convenient resource is a collection of the most common ABAP modules demonstrated within simple programs. These programs for easily searchable examples can be accessed from <http://extras.springer.com/978-1-85233-775-9>. The modules in this book are organised for quick reference. This concise reference contains: A full explanation of the layout of reference entries; a brief introduction to SAP coverage of conversion and date and time modules; file and directory modules; list long texts and number modules; useful integration modules for MSOffice and pop up dialog box management. This book organises over 300 modules, many of which are undocumented in text, and arranges them for quick and easy reference and explains when and where to use the most common SAP R 3 ABAP function modules. Managing Construction Projects Graham M. Winch, 2012-11-20 Project management is of critical importance in construction, yet its execution poses major challenges. In order to keep a project on track, decisions often have to be made before all the necessary information is available. Drawing on a wide range of research, Managing Construction Projects proposes new ways of thinking about project management in construction, exploring the skills required to manage uncertainty and offering techniques for thinking about the challenges involved. The second edition takes the information processing perspective introduced in the first edition and develops it further. In particular, this approach deepens the reader's understanding of the dynamics in the construction project process from the value proposition inherent in the project mission to the functioning asset that generates value for its owners and users. Managing Construction Projects is a unique and indispensable contribution to the available literature on construction project management. It will be of particular benefit to advanced students of construction and construction project management as well as contractors and quantity surveyors. Reviews of the First edition A massive review of the art and science of the management of projects that has the great virtue of being a good read wherever it is touched. It spills the dirt on things that went wrong, elucidates the history so you can understand the industry's current stance, draws on other countries' experience and explains the latest management processes. Throughout it is liberally sprinkled with anecdotes and case histories which amply illustrate the dos and don'ts for practitioners wishing to deliver projects on time to expected quality and price. A valuable book for students and practitioners alike. John D Findlay, Director, Stent. This is a valuable source for practitioners and students. It covers the A-Z of project management in a confident contemporary manner and provides a powerful and much needed conceptual perspective in place of a purely prescriptive approach. The engaging presentation introduces a range of challenges to established thinking about project management often by making comparisons between practices in the UK and those of other countries. Peter Lansley, Professor of Construction Management, University of Reading. A refreshing and unique study of information management and its impact upon international construction project management. The book is well presented and

written logical and succinct and inflexible enough to allow readers to either read from start to finish or to dip into selected chapters This book deserves to be an established text for any construction or civil engineering under and or postgraduate course CNBR 25th November 2003 Generous use is made of anecdotes and case histories throughout to support the theory the book illustrates the mistakes made by others and the means to deliver projects on time and to cost Building Services Journal April 2004     InfoWorld ,2000-12-11 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects     Computerworld ,2000-12-11 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network     Network World ,2000-12-11 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce     **Network World** ,2001-02-12 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce     *Computerworld* ,2001-02-12 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network     **InfoWorld** ,2003-01-20 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects     **Computerworld** ,1998-12-14 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network     **Computerworld** ,2005-12-19 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network     *Computerworld* ,2006-04-10 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media
