Saps Recruitment For 2016:

Police Integrity in South Africa Sanja Kutnjak Ivkovich, Adri Sauerman, 2020-04-29 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994 as the country's apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency, the South African Police Service (SAPS), that would provide unbiased policing to all the country's people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers probing their familiarity with official rules, their expectations of discipline within the SAPS, and their willingness to report misconduct. The book also examines the influence of the respondents' race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

Glaucoma Research and Clinical Advances 2016 to 2018 P.A. Knepper, J.R. Samples, 2016-02-19 This first volume of the New Concepts in Glaucoma series was conceived as a platform to express new ideas and approaches to understanding and solving primary open angle glaucoma. The authors have attempted to expand levels of knowledge, present new ideas, and challenge existing theories. Although the authors have painted a broad picture, the central theme of the book is to ask the right questions and seek the answers for patients with primary open angle glaucoma. **Let There Be Light!** Robert S. Dutch, 2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant? Robert Dutch worked in the UK's nuclear industry for many years as a scientist and then as a tutor at a nuclear training center. He also holds degrees in theology. Drawing upon his qualifications and experience, Robert addresses the controversial issue of nuclear power from a Christian perspective. In contrast to a negative nuclear narrative often portrayed, he presents a positive nuclear narrative alongside other ways of generating electricity. Be prepared to be challenged to think seriously about nuclear's merits in providing clean, low-carbon electricity. [Panic City](#) Martin J. Murray, 2020-03-10 Despite the end of white minority rule and the transition to parliamentary democracy, Johannesburg remains haunted by its tortured history of racial segregation and burdened by enduring inequalities in income, opportunities for stable work, and access to decent housing. Under these circumstances, Johannesburg has become one of the most dangerous cities in the world, where the yawning gap between the haves and have-nots has fueled a turn toward redistribution through crime. While wealthy residents have retreated into

heavily fortified gated communities and upscale security estates the less affluent have sought refuge in retrofitting their private homes into safe houses closing off public streets and hiring the services of private security companies to protect their suburban neighborhoods *Panic City* is an exploration of urban fear and its impact on the city's evolving siege architecture the transformation of policing and obsession with security that has fueled unprecedented private consumption of protection services Martin Murray analyzes the symbiotic relationship between public law enforcement agencies private security companies and neighborhood associations wherein buyers and sellers of security have reinvented ways of maintaining outdated segregation practices that define the urban poor as suspects **Why We Kill** Karl Kemp, 2024-03-02 Why do so many South Africans prefer taking the law into their own hands to relying on the police Why are those who do so often cheered or sympathised with Of the unprecedented 27 000 recorded murders in South Africa in 2022 at least 1 894 or 7 per cent were attributed to mob justice and vigilantism more than double the number from five years before In the first nine months of 2023 a further 1 472 mob justice deaths had already been registered Mob justice is nothing new but in recent years it has taken on an undeniably desperate furious edge From the breathtakingly violent Zandspruit massacre in May 2021 to the killings during the July unrest two months later to the march of Operation Dudula across the nation in 2022 vigilantism and the condoning of it has never before captured the zeitgeist of South Africa so sharply What has changed in the past few years and what does it augur for the future Following three recent cases of mob justice from the hellish metropolitan townships of Gauteng to the far flung bushveld of northern Limpopo and drawing on extensive research and interviews *Why We Kill* explores the roots realities and consequences of South Africa's current crisis of vigilantism

Democracies in Peril Ida Bastiaens,Nita Rudra,2018-07-26 Globalization is triggering a revenue shock in developing economies International trade taxes once the primary source of government revenue have been cut drastically in response to trade liberalization Bastiaens and Rudra make the novel argument that regime type is a major determinant of revenue raising capacity once free trade policies have been adopted Specifically policymakers in democracies confront greater challenges than their authoritarian counterparts when implementing tax reforms to offset liberalization s revenue shocks The repercussions are significant while the poor bear the brunt of this revenue shortfall in democracies authoritarian regimes are better off overall Paradoxically then citizens of democracies suffer precisely because their freer political culture constrains governmental ability to tax and redistribute under globalization This important contribution on the battle between open societies and the ability of governments to help their people prosper under globalization is essential reading for students and scholars of political economy development studies and comparative politics

Capitalism, State Power, and the Production of Extremism Tahir Abbas,2025-08-26 This book develops a comprehensive Marxist theory of radicalisation by synthesising and extending the author s two decades of research in this area The central argument of this book is that radicalisation cannot be fully understood without examining capitalism s role in creating and exacerbating the social economic and political conditions that give rise to it It contends that radicalisation is fundamentally a product of the contradictions inherent in the capitalist mode of production particularly in its neoliberal phase that the intensification of exploitation alienation and social atomisation under neoliberal capitalism creates the structural conditions for various forms of radicalisation that state responses to radicalisation rooted in the logic of capital and often employing repressive measures tend to reproduce and amplify the very conditions they seek to address and that processes of radicalisation are shaped by the complicated relationship among global capitalist dynamics and local social cultural and political contexts Therefore effective

approaches to countering radicalisation must address root causes by challenging the fundamental structures of capitalist society. In systematically situating contributions within a broader Marxist framework, the book offers a novel and timely intervention in the field of radicalisation studies. It provides scholars, students, and practitioners with a powerful framework for understanding and addressing one of the most pressing issues of our time, and not only advances academic debates but also contributes to broader struggles for social justice and equality.

Displacement, Belonging, and Migrant Agency in the Face of Power Tamar Mayer, Trinh Tran, 2022-06-29 This book centres the voices and agency of migrants by refocusing attention on the diversity and complexity of human mobility when seen from the perspective of people on the move. In doing so, the volume disrupts the binary logics of migrant, refugee, push/pull, and places of origin/destination that have informed the bulk of migration research. Drawn from a range of disciplines and methodologies, this anthology links disparate theories, approaches, and geographical foci to better understand the spectrum of the migratory experience from the viewpoint of migrants themselves. The book explores the causes and consequences of human displacement at different scales, both individual and community level, and across different time points from antiquity to the present, and geographies not just the Global North but also the Global South. Transnational scholars across a range of knowledge cultures advance a broader global discourse on mobility and migration that centres on the direct experiences and narratives of migrants themselves. Both interdisciplinary and accessible, this book will be useful for scholars and students in Migration Studies, Global Studies, Sociology, Geography, and Anthropology.

Police Work and Identity Andrew Faull, 2017-09-07 This is a book about the men and women who police contemporary South Africa. Drawing on rich original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in and shaped by a range of social, political, and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure and to rationalize their coercive practices. In an era where evidence and what works reigns supreme, and where cop culture is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions, and vulnerabilities remain central to how policing unfolds on the street. *Haryana Police Constable*
