You may think that a survival book is designed for those who regularly undertake dangerous adventures to remote places around the world. However it is not. The truth is that anyone can suddenly find themselves in a situation where their usual sources of food and drink have vanished and they need to use their wits to survive. If it is likely that a rescue party will be sent out to look for you then it is advisable to stay as close as possible to your last known position. However if this is not practical or there is unlikely to be a rescue party you will need to keep moving. Surprisingly speed is not the most important factor, caution is. You are in a situation where everything you do could be life threatening. In this situation it is important to remain calm and consider each issue as they arise. There are three key areas to surviving and returning to civilization. Finding a place to shelter for the night. There are several options and your best choice will depend upon the situation you find yourself in and whether you need to find your own way to civilization or wait for a rescue party to find you. Locating adequate supplies of food and water. This may appear to be difficult but it is certainly not impossible. When surviving in the wild you will need to consider food sources that you would not normally find appealing such as grubs. Finally you need to know how to navigate home and a few other essential tips which will help you to survive and
