

PLC-XP57L

XGA Portable Multimedia Projector

* Lens sold separately

** Image shows PLC-XP57L w/ LNS-S30

5,500 ANSI LUMENS LCD PROJECTOR

Utilizing high-output 318-watt UHP lamps as its light source, the PLC-XP57L delivers an amazing 5,500 ANSI lumens of brightness. Stacking two projectors in the twin-stack configuration can achieve up to 11,000 ANSI lumens of brightness.

OUTSTANDING CONTRAST RATIO – 1000:1

PLC-XP57L contains an optical compensator with a High-Contrast Optical System that achieves a contrast ratio as large as 1000:1, exhibiting more natural and smooth gradation.

FULL 10-BIT DIGITAL IMAGE PROCESSING

With an IC that uses a full 10-bit digital processing, PLC-XP57L delivers four times more color gradation steps than a conventional projector. As a result, it projects beautiful images with impressive color precision, rendering even tiny nuances in expressive details.

NETWORK CONTROL WITH P.J.-NET ORGANIZER PLUS II

An optional P.J.-Net Organizer Plus II allows for simple control and management of projectors via a CAT5 network connection. The user can use an optional network management software called P.J. Master, and be able to centrally control all P.J.-Net Organizer-mounted projectors within the network. The P.J.-Net Organizer Plus II has SHMP capability and allows connected computers to capture and modify the projected image, so other users will be able to write texts and draw figures on the captured image on their computers using drawing tools.

UPWARD / DOWNWARD PROJECTION

The PLC-XP57L can be tilted upward to facilitate ceiling-mount and floor mount installation.

VERTICAL/HORIZONTAL EDGE ENHANCEMENT

Images so crisp and smooth that is only made possible by the seamless edge enhancement technique. Enhancing image outlines while minimizing granular noise emphasis, the PLC-XP57L generates sharp and realistic images.

24/7* OPERATION

A newly developed liquid crystal panel with an optical compensator that creates linear polarization, together with improved optical block cooling system, gives the PLC-XP57L the capability of being operated on a 24/7* basis.

* In order to maintain a stable lamp condition, at least one hour of rest for the projector is required in each 24-hour period.

* For appropriate care and use of the projector, regular cleaning of air filters is necessary. Cleaning is recommended once a week. However, the frequency on which cleaning is required depends upon the installation or operation environments.

* To enhance ventilation and related reliability, the user may choose to utilize optional external filter "POA-FB03130".
