4 What is the difference between retail banking and investment banking  
Answer Retail banking provides services to individuals and small businesses such as savings accounts personal loans and mortgages Investment banking on the other hand caters to corporations governments and institutional clients by offering services like underwriting mergers and acquisitions and advisory on capital raising While retail banking focuses on personal financial management investment banking deals with large scale financial transactions and investments

5 Can you explain the concept of risk management in banking  
Answer Risk management in banking involves identifying assessing and mitigating risks that could affect the bank's financial stability These risks include credit risk market risk operational risk and liquidity risk For example credit risk occurs when borrowers are unable to repay loans while market risk is related to fluctuations in interest rates or asset prices Banks use various tools and strategies such as diversification hedging and setting risk limits to manage these risks and protect their assets

6 How would you explain the difference between a balance sheet and an income statement  
Answer A balance sheet provides a snapshot of a company's financial position at a specific point in time showing assets liabilities and equity The income statement on the other hand shows the company's performance over a period detailing revenue expenses and profit or loss While the balance sheet reflects the company's financial health the income statement indicates its profitability over time

7 What is Basel III  
Answer Basel III is an international regulatory framework developed to strengthen regulation supervision and risk management in the banking sector It focuses on improving the quality of capital increasing liquidity requirements and reducing leverage to prevent excessive risk taking by banks Basel III was introduced in response to the 2008 financial crisis to ensure that banks have enough capital to withstand financial shocks

8 How do interest rates affect banking operations  
Answer Interest rates have a direct impact on a bank's profitability When interest rates rise banks can charge higher rates on loans increasing their revenue However higher rates can also reduce the demand for borrowing On the other hand lower interest rates can stimulate borrowing but may decrease the bank's profit margins on loans Interest rates also affect the bank's cost of capital and the return on investments in interest bearing assets like bonds

9 What do you understand by the term capital adequacy ratio CAR  
Answer The Capital Adequacy Ratio CAR is a measure used by regulators to assess a bank's capital strength It is the ratio of a bank's capital to its risk weighted assets A high CAR ensures that the bank can absorb a reasonable amount of loss and complies with statutory capital requirements This ratio is crucial for maintaining the financial stability of banks particularly during periods of economic stress
