

## What is SAP FSCM

SAP Financial Supply Chain Management optimizes the financial and information flows within a company and between business partners. Following components of SAP Financial Supply Chain Management are implemented at OLAM:

- SAP Collections Management: Application for proactive receivables management
- SAP Dispute Management: Application for efficient processing of receivables-related dispute cases

## SAP Collections Management

The components of SAP Collections Management support you in active receivables management. Using collections strategies, you can evaluate and prioritize customers from a receivables management view. Customers that fulfill the rules defined in a strategy are distributed to the worklists of the collection specialists. The collection specialists then contact the customers in their order of priority in order to collect receivables.

You can display an overview of the current status of the open invoices of a customer account as well as the last payments, the customer contacts, and open resubmissions. If a customer gives a promise to pay, you can enter this in the system and follow its status. You can also define that a customer is to reappear on the worklist on a certain date. When you return to the worklist, you can document the complete customer contact in the system.

## Roles in Collections Management

The functionalities in this module is designed for the following roles:

- Collections Specialist (Responsible for Collecting receivables)
- Collections Supervisor/Manager (Responsible for controlling the process of collecting receivables)
