### INSTALLATION

All installations are to be performed in accordance with the parameters of this manual and all appropriate codes and standards from the local, state, and federal authority having jurisdiction.

#### CAUTION

If a hydrostatic testing of system piping is required, disconnect all actuator(s) (master and slaves) and cylinder(s) from piping before pressurizing system piping.

Before the SAPPHIRE system is installed, the qualified installer should develop installation drawings in order to locate the equipment, to determine an actuation and distribution piping routing, (refer to Piping and Actuation Requirements, located in SECTION V – DESIGN, for both actuation and distribution piping limitations.

For successful system performance, the SAPPHIRE system components must be installed within a temperature range of 0 °F to 130 °F (–18 °C to 55 °C).
