New Public Management in Africa Benon C. Basheka, Lukamba-Muhiya. Tshombe, 2017-08-25 The administrative sciences have been dominated by a turn to managerial perspectives in the late 20th and early 21st centuries and in the spirit of this turn New Public Management or NPM promises to produce efficient responsible and client oriented public services The reforms carried out in the pursuit of New Public Management are often accompanied by great optimism and rapid enthusiastic steps toward implementation Even in highly developed industrial countries however these fundamental reforms often overlook the political and cultural contexts of the implementing country New Public Management in Africa Emerging Issues and Lessons provides much needed theoretical foundations for NPM reforms in the African context and reflects on the success of existing reforms in the development of several African states The individual contributions in this timely volume provide important analyses of academic discourse practical policy achievements and desiderata The book as a whole however provides a valuable impetus for public administration research in and on African states sharing findings on the results of reforms to date and adjustments required

for these reforms to succeed For public administration researchers outside of Africa this book offers a review of New Public Management case studies that are unavailable or difficult to find elsewhere contributing much to the exchange between African and Western administration science research and demonstrating that African administrative research is well prepared to help resolve global challenges Dead Cows for Piranhas Hazel Friedman,2014-10-30 A high octane journey into the brutal underworld of the South African and transnational drug trade Journalist Hazel Friedman was on assignment in Thailand to document the stories of the increasing number of South Africans convicted as drug mules when she made a horrifying discovery Many of the drug traffickers are in fact decoys These individuals find themselves coerced or deceived into drug running The dead cows are set up to be arrested thereby allowing professional mules carrying much larger quantities of drugs to slip past undetected Through the heartbreaking accounts of the prisoners Friedman became convinced that the decoys should not be viewed as perpetrators of narcotics trafficking Her own high risk investigations including an attempt to get recruited as a drug mule filmed with a secret camera as well as trying to track down the middlemen appeared to confirm this She concluded that many drug mules are victims of human trafficking as pawns readily sacrificed in a profit driven war waged by global drug barons Neither Good Nor Bad Gerhard Besier,Katarzyna Stokłosa,2014-06-19 When confronted by a range of violent actions perpetrated by lone individuals contemporary society exhibits a constant tendency to react in terms of helpless even perplexed horror Seeking explanations for the apparently inexplicable commentators often hurry to declare the perpetrators as evil This question is not restricted to individuals history has repeatedly demonstrated how groups and even entire nations can embark on a criminal plan united by the conviction that they were fighting for a good and just cause Which circumstances occasioned such actions What was their motivation Applying a number of historical scientific and social scientific approaches to this question this study produces an integrative portrait of the reasons for human behavior and advances a number of different interpretations for their genesis The book makes clear the extent to which we live in socially constructed realities in which we cling for dear life to a range of conceptions and beliefs which can all too easily fall apart in situations of crisis *Africa in Contemporary Perspective* Manuh, Takyiwaa,Sutherland-Addy, Esi,2014-05-08 An important feature of Ghanaian tertiary education is the foundational African Studies Programme which was initiated in the early 1960s Unfortunately hardly any readers exist which bring together a body of knowledge on the themes issues and debates which inform and animate research and teaching in African Studies particularly on the African continent This becomes even more important when we consider the need for knowledge on Africa that is not Eurocentric or sensationalised but driven from internal understandings of life and prospects in Africa Dominant representations and perceptions of Africa usually depict a continent in crisis Rather than buying into external representations of Africa with its lacks and aspirations for Western modernities we insist that African scholars in particular should be in the forefront of promoting understanding of the pluri lingual overlapping and dense reality of life and developments on the continent to

produce relevant and usable knowledge Continuing and renewed interest in Africa s resources including the land mass economy minerals visual arts and performance cultures as well as bio medical knowledge and products by old and new geopolitical players obliges African scholars to transcend disciplinary boundaries and to work with each other to advance knowledge and uses of those resources in the interests of Africa s people

Guide to Psychological Assessment with African Americans Lorraine T. Benuto, Brian D. Leany, 2014-11-20 The movements toward cultural sensitivity and evidence based practice are watershed developments in clinical psychology As a population with a long history of substandard treatment from mental health systems African Americans have especially benefitted from these improvements But as with other racial and ethnic minorities finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge The Guide to Psychological Assessment with African Americans aims to close the evaluation therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality Expert contributors analyze scarce and far flung data identify strengths and limitations of measures and norms in their use with African American clients and advise on avoiding biases in interpreting results The editors advocate for a theory based hypothesis testing approach to assessment when empirical evidence is lacking and offer guidelines for decision making that is effective as well as ethnically aware The Guide s findings insights and practical information cover the gamut of test and diagnostic areas including IQ and personality Generalized anxiety disorder panic and phobias Neuropsychological assessment cognitive decline and dementia Mood disorders and suicidality Forensic assessment risk and recidivism Measures specific to children and adolescents Plus PTSD substance disorders eating pathology and more Expertly complementing cross cultural treatment texts the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning useful to clinical psychologists neuropsychologists and clinical social workers
