Hearings, Reports and Prints of the House Committee on Education and Labor United States. Congress. House. Committee on Education and Labor,1977      *The Meritocracy Trap* Daniel Markovits,2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy It is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy s successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people      **Assessing the Generic Outcomes of College** Gary R. The Fair Credit Reporting Act and Issues Presented by Reauthorization of the Expiring Preemption Provisions United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs, 2004 **Attention and Self-Regulation** C. S. Carver, M. F. Scheier, 2012-12-06 Seek simplicity and distrust it Alfred North Whitehead It will become all too clear that an ability to see patterns in behavior an ability that some might feel proud of can lead more easily to a wrong description than a right one William T Powers The goal of the theorist the scholar is to take a collection of observations of the world and perceive order in them This process necessarily imposes an artificial simplicity upon those observations That is specific observations are weighed differently from each other whenever a theoretical account is abstracted from raw experiences Some observed events are misunderstood or distorted others are seen as representing random fluctuations and are ignored

and yet others are viewed as centrally important This abstraction and oversimplification of reality is inevitable in theory construction Moreover the abstracted vision builds upon itself That is as a structure begins to emerge from continued observation the structure itself guides the search for new information The result is a construction that is more elaborate than what existed before but it still is usually simpler than reality It is important for scholars to believe in the value of their task and in the general correctness of the vision that guides their work This commitment and the hope of progress that follows from it make it possible to continue even when the work is difficult and slow
