

## Optimiser

**SVT**  
2-day Optimiser

This Fuel-saving Controller can replace a conventional time switch on a heating system and provide a variable start time dependent on the fall of room temperature during the off period.

It is used to switch on and off central heating systems and will substantially reduce fuel consumption compared with fixed time starting. In all but the very coldest weather the start time is delayed until the latest time consistent with the amount of heat necessary to regain the required temperature at occupancy time.

**FEATURES**

- Easy installation - only one sensor required (packed with the controller)
- Programme override switch
- Choice of day control by separate compensator or built-in on/off day control
- Minimum night 'inside' temperature protection
- Analogue and Digital clock versions available

## Compensators

**CSC**  
Compensator  
Controllers

CSC Compensators are designed for use in residential/ commercial radiator systems to control either a three port mixing valve or a boiler. The controller senses outside temperature and varies the water flow temperature to the radiator. As the outside temperature falls, the radiator temperature is increased.

An optional room temperature sensor can be used to trim the water temperature based on room temperature. The CSC can average up to four room sensors.

**FEATURES**

- Easy to install and commission
- Shipped with typical default values
- Operates a three port valve or boiler
- Max. return function for District Heating applications
- Adjustable economy function
- Night Set Back (NSB) and set-up/boost inputs
- Flow high limit feature
- User configurable Day/Night plant operation
- Room influence mode selection
- Cost effective upgrade of all obsolete Climaticonic controllers

## Main Plant Controllers

**CXR**  
AHU Room Reset  
Controller

The CXR Controller is used to control room temperature by resetting the supply duct air temperature. The room sensor resets the duct supply temperature to achieve the desired room temperature. The room temperature can be sensed in the room or extract duct. The supply duct loop has a purely proportional control action with the room reset being a proportional plus integral control action.

**FEATURES**

- Easy to install and commission
- Shipped with typical default values
- Quick set mode allows basic settings to be easily checked and set
- Single override switch
- Night Set Back (NSB), set-up, summer and night sensor selection switched inputs
- Optional Scandinavian night sensor
- Up to 4 room sensors can be used for average room temperature
- Remote setting input for room set value (RPV)
- Cost effective upgrade of all obsolete Climaticonic controllers
