## **Satellite Internet Nigeria Report:**

**The Report: Nigeria 2012** , **The Report: Nigeria 2015** Oxford Business Group,2015-05-05 Despite concerns linked to short term and cyclical risks including unequal development policy uncertainty declining oil prices and localised unrest the longer term growth fundamentals are clear Following the presidential elections in March 2015 the newly elected government of President Muhammadu Buhari will face a host of challenges ranging from high levels of rural poverty to concerns over governance and an insurgency in the north The outcome of the presidential elections gave Nigeria its first peaceful handover of power in more than 16 years as well as a boost of momentum that along with its economic fundamentals places it on the cusp of potentially long term broad based growth *World Internet Development Report 2018* Chinese Academy of Cyberspace Studies,2020-06-16 This book is an important outcome of the Fifth World Internet Conference It provides a comprehensive account of the new trends and highlights of global Internet development over the past year covering network infrastructure information technology digital economy world internet media cyber security and international cyberspace governance This year the book improves the Global Internet Development Index System and adds more countries into the assessed list in order to reflect more comprehensively objectively and accurately the general situation of the world Internet development and thus to provide reference for all countries in promoting Internet development and governance *The Report: Nigeria 2019* Oliver Cornock, Combining oil and gas wealth with the entrepreneurial efforts of its predominantly young population Nigeria has developed a business friendly environment over the past two decades of civilian rule The country has effectively leveraged its abundance of natural resources and harnessed the strength of its 193m strong population to become a key nation both on the African continent and beyond *The Report: Nigeria 2016* Oxford Business Group,2016-10-06 Nigeria is the largest economy in Africa with a GDP of 487bn in 2015 according to the World Bank The country asserted the mantle of the continent s largest economy in 2013 following a rebasing exercise However its large population means that Nigeria remains a comparatively poor country in per capita terms with a lower GDP per capita than several of its sub Saharan neighbors Following a real GDP contract of 1.5% in 2016 the IMF forecasts that growth will reach 0.8% in 2017 and 1.9% in 2018 While growth began to pick up in the first half of 2017 Nigeria still has much work to do However there is the sentiment that the economy has turned a corner and has begun to see a silver lining Devaluation of the naira rising inflation the drop in oil revenues the slowdown in oil production and the leader softening of growth *Repressive State and Resurgent Media Under Nigeria's Military Dictatorship, 1988-98* Ayo Olukotun,2004 This study documents a crucial dimension of the resistance of Nigerian civil society to a repressive and monumentally corrupt military state in the late 1980s and 1990s in Nigeria Employing a neo Gramscian theoretical framework the study relates how a section of the media defied censorship laws outright bans incarceration and the assassination of opposition figures to prosecute the struggle for democracy It captures the tensions and contradictions

between a pliant section of the media which sought to legitimise the state and a critical section of the same media which in alliance with radical civil society invented rebellious outlets to carry on the struggle against dictatorship The study seeks to make fresh departures by documenting not only the role of the national media in the throes of democratic struggle but that of the international media whose role was influential in the years studied Finally the report offers empirical proof of the mechanisms by which a vibrant civil society can curb the ravages of a predatory state in an African country Book jacket

**World Development Report 2021** World Bank,2021-07-02 The unprecedented growth of data and its ubiquity in our daily lives signal that the digital revolution is transforming the world But much of the value of data remains untapped waiting to be realized Data collected for one particular purpose has the potential to generate economic value in applications far beyond those originally anticipated However many barriers stand in the way of the beneficial reuse of data ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust The World Development Report 2021 Data for Better Lives will explore the tremendous potential of the changing data landscape to improve the lives of poor people but also to open backdoors that can harm individuals businesses and societies The first part of the report assesses how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth The second part of the report focuses on issues of governance law and policy that can help realize data s potential benefits while safeguarding against harmful outcomes By examining these issues the report aims to show how data can be leveraged to benefit the lives of poor people
