Astronautics Year An International Astronautical and Military Space Missile Review of 1964 documents in detail the international astronautical and military space missile activities conducted in 1964 This book focuses on two major space achievements RANGER 7 and VOSKHOD I RANGER 7 was a spectacular achievement demonstrated by Jet Propulsion Laboratory while VOSKHOD I was claimed as the biggest rocket in existence that was launched while carrying two retro rocket systems This compilation also provides brief notes on a number of space missile projects and programs underway during 1964 such as the AADS 70 ADOBE AIM 47A and APOLLO A table containing a fully comprehensive listing of all announced spacecraft launch attempts made during the same year are likewise described This text is recommended for researchers and specialists concerned with aeronautics and aerospace research *Car and Driver* ,2006 **Congressional Record** United States. Congress,1970 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 *Bulletin of the Atomic Scientists* ,1961-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Scientific and Technical Aerospace Reports* ,1992 *Ebony* ,2004 *The Moon* DK,2025-05-13 The Moon has been an object of fascination for religions cultures and societies the world over since the dawn of humanity The Moon is a beautifully illustrated account of our lunar neighbor in all its guises a guiding light in the night sky the driver of oceanic tides and natural cycles the subject of exhaustive scientific study and an enduring influence in literature art and popular culture Exploring theories for the Moon s origins around 4 5 billion years ago the book charts its influence on the calendar systems and mythologies of early societies and its role in the invention of the telescope and the science fiction genre It tells the incredible story of the Cold War space race and the first Moon landings Specially commissioned illustrations capture the Moon s phases and motions in vivid detail while stunning photography and artefacts bring the rich history of lunar observation and exploration to life The last chapter of the book features extensive coverage of NASA s Artemis mission to return astronauts to the lunar landscape in 2026 paving the way for future missions to Mars The book also includes a guide to observing the Moon complete with annotated maps and profiles of key physical features such as Tycho Crater and the Sea of Tranquility Straddling science culture and history across the world The Moon is a captivating and richly informative celebration **Homesteading Space** David Hitt,Owen K. Garriott,Joe Kerwin,2008-01-01 As the United States and the Soviet Union went from exploring space to living in it a space station was conceived as the logical successor to the Apollo moon program But between conception and execution there was the vastness of space itself to say

nothing of monumental technological challenges Homesteading Space by two of Skylab's own astronauts and a NASA journalist tells the dramatic story of America's first space station from beginning to fiery end Homesteading Space is much more than a story of technological and scientific success it is also an absorbing sometimes humorous often inspiring account of the determined hardworking individuals who shepherded the program through a near disastrous launch a heroic rescue and an exhausting study of Comet Kohoutek as well as the lab's ultimate descent into the Indian Ocean Featuring the unpublished in flight diary of astronaut Alan Bean the book is replete with the personal recollections and experiences of the Skylab crew and those who worked with them in training during the mission and in bringing them safely home **Rocket and Spacecraft Propulsion** Martin J. L. Turner, 2008-11-05 The revised edition of this practical hands on book discusses the range of launch vehicles in use today throughout the world and includes the very latest details of some of the advanced propulsion systems currently being developed The author covers the fundamentals of the subject from the basic principles of rocket propulsion and vehicle dynamics through the theory and practice of liquid and solid propellant motors to new and future developments The revised edition will stick to the same principle of providing a serious exposition of the principles and practice of rocket propulsion but from the point of view of the user and enquirer who is not an engineering specialist Most chapters will remain substantially the same as the first edition they will be updated where necessary and errata corrected The main revisions will be to the chapter on electric propulsion where there have been significant new developments both in engine types and in practical applications This is now seen as the key to planetary exploration by robotic probes and should therefore be reflected Nuclear propulsion has emerged from the doldrums and is now seen as a definite possibility for outer solar system robotic exploration and as enabling technology for a human mars expedition A new chapter on nuclear thermal propulsion has been added to reflect this revival of interest *The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces*, 1905
