G. Kapteyn, R.H. Lauwaars, P.H. Kooijmans, 1982-10-19 **Give and Take** Nitsan Chorev, 2019-12-10 Give and Take looks at local drug manufacturing in Kenya Tanzania and Uganda from the early 1980s to the present to understand the impact of foreign aid on industrial development While foreign aid has been attacked by critics as wasteful counterproductive or exploitative Nitsan Chorev makes a clear case for the effectiveness of what she terms developmental foreign aid Against the backdrop of Africa's pursuit of economic self sufficiency the battle against AIDS and malaria and bitter negotiations over affordable drugs Chorev offers an important corrective to popular views on foreign aid and development She shows that when foreign aid has provided markets monitoring and mentoring it has supported the emergence and upgrading of local production In instances where donors were willing to procure local drugs they created new markets that gave local entrepreneurs an incentive to produce new types of drugs In turn when donors enforced exacting standards as a condition to access those markets they gave these producers an incentive to improve quality standards And where technical know how was not readily available and donors provided mentoring local producers received the guidance necessary for improving production processes Without losing sight of domestic political economic conditions historical legacies and foreign aid's own internal contradictions Give and Take presents groundbreaking insights into the conditions under which foreign aid can be effective **Advanced Practice Nursing: Essential Knowledge for the Profession** Susan M. Commodity Thomas F. Babor, 2010-02-25 *Alcohol No Ordinary Commodity Research and Public Policy Second Edition* is a collaborative effort by an international group of addiction scientists to improve the linkages between addiction science and alcohol policy. It presents in a comprehensive practical and readily accessible form the accumulated scientific knowledge on alcohol research that has a direct relevance to the development of alcohol policy on local national and international levels. It provides an objective analytical basis on which to build relevant policies globally and informs policy makers who have direct responsibility for public health and social welfare. By locating alcohol policy primarily within the realm of public health, this book draws attention to the growing tendency for governments both national and local to consider alcohol misuse as a major determinant of ill health and to organize societal responses accordingly. The scope of the book is comprehensive and international. The authors describe the conceptual basis for a rational alcohol policy and present new epidemiological data on the global dimensions of alcohol misuse. The core of the book is a critical review of the cumulative scientific evidence in seven general areas of alcohol policy: pricing and taxation; regulating the physical availability of alcohol; modifying the environment in which drinking occurs; drinking driving; countermeasures; marketing restrictions; primary prevention programs in schools and other settings; and treatment and early intervention services. The final chapters discuss the current state of alcohol policy in different parts of the world and describe the need for a new approach to alcohol policy that is evidence based, realistic and coordinated. It will appeal to those involved in both addiction science and drug policy as well as those in the wider fields of public health, health policy, epidemiology and practising clinicians. A companion volume published by Oxford University Press, *Drug Policy and the Public Good* is also available. **On Politics of 21st Century First Edition** Jerico Matias
