Confucianism and Christianity John D. Young, 1983-02-01 This is a pioneer study of the Christian missionaries in late Ming and early Ching China in the sense that it draws upon source materials hitherto neglected to give an entirely new perspective on the history of the first meeting between East and West. The book centres around a major theme: the first confrontation between the Supreme Ultimate or T'ien of the Confucian cosmological order and the Christian anthropomorphic God as conveyed to the Chinese literati by the Western missionaries. This encounter, which is of an historical as well as metaphysical nature, also involves a conflict between two diametrically opposed value systems of human socio-ethical obligations. This study begins by examining the genesis of the Jesuit policy of accommodation and how the missionaries developed their particular approach. But the author probes beyond traditional scholarship and argues that Matteo Ricci was successful in convincing some Confucianists, notably Hs. Kuang-ch'i, of the universality of Christianity. On the other hand, the majority of the literati felt threatened by the heterodox teaching and argued against it. Finally, the Kang-hsi Emperor had to mediate and the result was the end of the first phase of Western activities in the Middle Kingdom. Throughout, the major emphasis is on how one idea, namely the idea of God, was viewed by the barbarians from the West and by the Confucian literati.

The Intellectual Properties of Learning John

Willinsky, 2018-01-02 Providing a sweeping millennium-plus history of the learned book in the West, John Willinsky puts current debates over intellectual property into context, asking what it is about learning that helped to create the concept, even as it gave the products of knowledge a different legal and economic standing than other sorts of property. Willinsky begins with Saint Jerome in the fifth century, then traces the evolution of reading, writing, and editing practices in monasteries, schools, universities, and among independent scholars through the medieval period and into the Renaissance. He delves into the influx of Islamic learning and the rediscovery of classical texts, the dissolution of the monasteries, and the founding of the Bodleian Library, before finally arriving at John Locke, whose influential lobbying helped bring about the first copyright law, the Statute of Anne of 1710. Willinsky's bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from, if not wholly uncompromised by, the commercial economy; that this concept inspired making it clear that today's push for marketable intellectual property threatens the very nature of the quest for learning on which it rests.

Millgram,2014-01-10 This book is a reader friendly treatment of the Joseph story one of the most popular tales in the Bible Instead of the usual interpretation as an Horatio Alger success story the text proposes that we are presented with a cautionary tale of high achievement and the pursuit of success In the context of the larger biblical narrative Joseph s short term success leads to the enslavement of his descendants and the centuries long derailment of the destiny of the Children of Israel The self limiting nature of the pursuit of power is just one of the themes illuminated in this work
