Migrations And Cultures Thomas Sowell,2025-04-01 Most commentators look at the issue of immigration from the viewpoint of immediate politics In doing so they focus on only a piece of the issue and lose touch with the larger picture Now Thomas Sowell offers a sweeping historical and global look at a large number of migrations over a long period of time *Migrations and Cultures* shows the persistence of cultural traits in particular racial and ethnic groups and the role these groups relocations play in redistributing skills knowledge and other forms of human capital answers the question What are the effects of disseminating the patterns of the particular set of skills attitudes and lifestyles each ethnic group has carried forth both for the immigrants and for the host countries in social as well as economic terms Shadow Economies in the Globalising World Anna Knutsson,2022-12-30 From West Indian sugar and bottles of Southeast Asian arrack to French red wines English felt cloth and Mediterranean lemons many global wares ended up in the Scandinavian borderlands during the late eighteenth century This book explores how and why these goods came to be there and analyses what smuggling can reveal about the emergence of global trade the formation of the nation state and the development of consumer society in Europe's northernmost outskirts This book shows that the global underground was ubiquitous in the Nordic countries and fundamentally altered them politically economically socially and culturally Through re evaluating the role of smuggling the book complements and challenges established historical accounts about state building market dynamics consumer culture and ideas and identity It also offers a roadmap for how to think about illegal global trade and how to approach this notoriously difficult research field By integrating illegality the book aims to show how an illicit web entangled often overlooked peripheral territories with traditional portals of globalisation and proposes a novel take on early modern globalisation and the paths to modernity in the European hinterlands To achieve this a wide variety of sources are used including court records administrative sources diaries ambassadorial correspondence and maps in various languages including Swedish Finnish Norwegian English and French This book makes a significant contribution to the literature on economic history the first wave of globalisation the study of shadow economies and Scandinavian history more broadly

The Early Mercantilists Mark Blaug,1991 The Mercantilist School never presented a common front but is associated with a common outlook the idea of specie or bullion as the essence of wealth and the notion that a positive balance of trade is an index of national welfare It is also associated with an emphasis on population growth and low wages a concern with full

employment and the far reaching denial of foreign trade as a source of net gain to the world as a whole that is international trade was regarded as a zero sum gain and particular nations were thought to benefit from international trade only at the expense of others The underlying idea that a permanent balance of trade surplus should be beneficial to a nation has been a source of discussion right down to the present day **Gunpowder, Explosives and the State** Brenda J.

Buchanan,2016-12-05 Gunpowder studies are still in their infancy despite the long standing civil and military importance of this explosive since its discovery in China in the mid ninth century AD In this second volume by contributors who meet regularly at symposia of the International Committee for the History of Technology ICOHTEC the research is again rooted in the investigation of the technology of explosives manufacture but the fact that the chapters range in scope from the Old World to the New from sources of raw materials in south east Asia to the complications of manufacture in the West shows that the story is more than the simple one of how an intriguing product was made This volume is the first to develop the implications of the subject not just in the sense of relating it to changing military technologies but in that of seeing the securing of gunpowder supplies as fundamental to the power of the state and imperial pretensions The search for saltpetre for example an essential ingredient of gunpowder became a powerful engine of sea going European trade from the early seventeenth century Smaller states like Venice were unable to form these distant connections and so to sustain a gunpowder army Stronger states like France and Britain were able to do so and became even more powerful as the demand for improved explosives fostered national strengths leading to a development of the sciences especially chemistry in the former case and of manufacturing techniques in the latter *From Slavery to Freedom* Seymour Drescher,1999-05-17 The entries in this

volume focus upon the rise and fall of the Atlantic slave system in comparative perspective The subjects range from the rise of the slave trade in early modern Europe to a comparison of slave trade and the Holocaust of the twentieth century dealing with both the history and historiography of slavery and abolition They include essays on British French Dutch and Brazilian abolition as well as essays on the historiography of slavery and abolition since the publication of Eric Williams s *Capitalism and Slavery* more than fifty years ago **Society and Economy in Early Modern Europe, 1450-1789** Barry Taylor,1989

English Economic Thought in the Seventeenth Century Seiichiro Ito,2020-11-09 In the seventeenth century England saw Holland as an economic power to learn from and compete with English Economic Thought in the Seventeenth Century Rejecting the Dutch Model analyses English economic discourse during this period and explores the ways in which England s economy was shaped by the example of its Dutch rival Drawing on an impressive range of primary and secondary sources the chapters explore four key areas of controversy in order to illuminate the development of English economic thought at this time These areas include the herring industry the setting of interest rates banking and funds and land registration and credit The links between each of these debates are highlighted and attention is also given to the broader issues of international trade social reform and credit This book is of strong interest to advanced students and researchers of the history of economic

Middle Eastern studies History in the Making J. H. Elliott, 2012-10-30 The famous historian looks at his own research and historical scholarship to examine the difficulty of writing the history of a nation other than one's own and the way that the study of history has changed in the last half century **Wealth, Poverty and Politics** Thomas Sowell, 2016-09-06 In *Wealth Poverty and Politics* Thomas Sowell, one of the foremost conservative public intellectuals in this country, argues that political and ideological struggles have led to dangerous confusion about income inequality in America. Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories while ignoring the true determinant of income inequality: the production of wealth. We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography, demography, and culture. Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state. Refuting Thomas Piketty, Paul Krugman, and others on the left, Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe. *Transcending partisanship* through a careful examination of data, *Wealth Poverty and Politics* reveals the truth about the most explosive political issue of our time.

Empires of Food Andrew Rimas, Evan Fraser, 2010-06-15 We are what we eat: this aphorism contains a profound truth about civilization, one that has played out on the world historical stage over many millennia of human endeavor. Using the colorful diaries of a sixteenth-century merchant as a narrative guide, *Empires of Food* vividly chronicles the fate of people and societies for the past twelve thousand years through the foods they grew, hunted, traded, and ate, and gives us fascinating and devastating insights into what to expect in years to come. In energetic prose, agricultural expert Evan D. G. Fraser and journalist Andrew Rimas tell gripping stories that capture the flavor of places as disparate as ancient Mesopotamia and imperial Britain, taking us from the first city in the once thriving Fertile Crescent to today's overworked breadbaskets and rice bowls in the United States and China, showing just what food has meant to humanity. Cities, culture, art, government, and religion are founded on the creation and exchange of food surpluses; complex societies built by shipping corn and wheat and rice up rivers and into the stewpots of history's generations. But eventually, inevitably, the crops fail, the fields erode, or the temperature drops and the center of power shifts. Cultures descend into dark ages of poverty, famine, and war. It happened at the end of the Roman Empire when slave plantations overworked Europe's and Egypt's soil and drained its vigor. It happened to the Mayans who abandoned their great cities during centuries of drought. It happened in the fourteenth century when medieval societies crashed in famine and plague, and again in the nineteenth century when catastrophic colonial schemes plunged half the world into a poverty from which it has never recovered. And today, even though we live in an age of astounding agricultural productivity and genetically modified crops, our food supplies are once again in peril. *Empires of Food* brilliantly recounts the history of cyclic consumption, but it is also the story of the future: for example, how a shrimp boat hauling up an empty net in the Mekong Delta could spark a riot in the Caribbean. It tells what happens when a culture or

nation runs out of food and shows us the face of the world turned hungry The authors argue that neither local food movements nor free market economists will stave off the next crash and they propose their own solutions A fascinating fresh history told through the prism of the dining table Empires of Food offers a grand scope and a provocative analysis of the world today indispensable in this time of global warming and food crises *The Classical Weekly*, 1913 **Managing the Wealth of Nations** Philipp Robinson Rössner, 2023-03-27 Commerce and manufactures gradually introduced order and good government wrote Adam Smith in his Wealth of Nations and with them the liberty and security of individuals However Philipp Robinson Rössner shows how when looked at in the face of history it has usually been the other way around This book follows the development of capitalism from the Middle Ages through the industrial revolution to the modern day casting new light on the areas where premodern political economies of growth and development made a difference It shows how order and governance provided the foundation for prosperity growth and the wealth of nations Written for scholars and students of economic history this is a pioneering new study that debunks the neoliberal origin myth of how capitalism came into the world **Empire at the Periphery** Christian J. Koot, 2015-03-08 This book examines the trade networks that connected the British and Dutch colonies in the Atlantic and how they formed a central part of the commercial activity in the early Atlantic World
