Therefore, it is essential to determine how the efficacy of research can be enhanced at various levels, especially at the academic level. Of primary relevance in this is research connected to communication, both human to human and through media, and interactions with information sources. There exists a need for a resource for communications and information science researchers to enhance the effectiveness, impact, and visibility of research. *Cases on Developing Effective Research Plans for Communications and Information Science* provides relevant frameworks for research in communications and information science. It elaborates on the strategic role of research at different levels of the information and communication society. Drawing upon 21 years of photographic experience and sociological research, Terence Heng's immersive and narrative style will introduce photography as a qualitative method, discuss the intricacies of challenges and opportunities for using a camera in the field, explore common themes and topics in social science research, including photographing rituals, space, people, and objects, advise on navigating the always-evolving technological landscapes of traditional, digital, and mobile photography. *Visual Methods in the Field: Photography for the Social Sciences* is a photography guide written for researchers by a researcher. Using in-depth ethnographic case studies from research done in various urban environments, this book will act as a crucial bridge for students in geography, sociology, education, media studies, and other social sciences to incorporate photography into their research repertoire.      *The Routledge Companion to Photography and Visual Culture* Moritz Neumüller, 2018-09-21 The *Routledge Companion to Photography and Visual Culture* is a seminal reference source for the ever-changing field of photography. smartphone can be a citizen photojournalist who needs professional photojournalism This rather flippant question cuts to the heart of a set of pressing issues where an array of impassioned voices may be heard in vigorous debate While some of these voices are confidently predicting photojournalism's impending demise as the latest casualty of internet driven convergence others are heralding its dramatic rebirth pointing to the democratisation of what was once the exclusive domain of the professional Regardless of where one is situated in relation to these stark polarities however it is readily apparent that photojournalism is being decisively transformed across shifting uneven conditions for civic participation in ways that raise important questions for journalism's forms and practices in a digital era This book's contributors identify and critique a range of factors currently recasting photojournalism's professional ethos devoting particular attention to the challenges posed by the rise of citizen journalism This book was originally published as two special issues in *Digital Journalism* and *Journalism Practice*

blueprint for white conceptions of the Black male body existing between fear and fantasy simultaneously an object of desire and an instrument of violence Reframing boxing as yet another way whiteness establishes the violent mythology of its supremacy Saggese highlights the role of imagery in normalizing a culture of anti Blackness
