development planning and global sustainability contribute valuable insights to the evolving field of development planning theory Geographical Approaches to Global Sustainable Development Goals SDGs examines how different regions across the globe are implementing development planning strategies to achieve the United Nations SDGs By analyzing diverse regional approaches it provides crucial insights into effective localization of global sustainability targets while acknowledging unique geographical contexts Covering topics such as politics social commerce and intellectual property regime this book is an excellent resource for regional planners project managers corporate sustainability consultants sustainability coordinators environmental impact assessors civil society organizations development project investors professionals researchers scholars academicians and more

Teaching Geography 11-18: a Conceptual Approach David Lambert, John Morgan, 2010-01-16 This is a must read for all 11 18 geography educators It argues for a new geography curriculum founded on a set of major concepts that are profoundly relevant to 21st century life For years books on 11 18 geography education have focussed on classroom techniques new pedagogic technologies and alternative modes of student assessment Not this one Teaching Geography 11 18 digs deep It asks not only what geography is for but bases its answer on a set of key concepts able to sustain an exciting and relevant curriculum It also grounds its many arguments in the latest geographical research thus re establishing the broken connection between geography teaching in schools and that in higher education Professor Noel Castree University of Manchester UK This engaging and stimulating book aims to radically re shape and sharpen debates in geography education by taking an entirely fresh approach to both the subject and its place in secondary education Key questions addressed in this book include What is the place of geography within the secondary school curriculum To what extent does school geography reflect and engage with contemporary issues and theories from the wider subject What are the issues challenges and opportunities of a concept led approach to teaching geography What are the implications of ICT media and technology for the future of geography teaching in schools Influenced by the revised national curriculum for geography which has reduced the prescribed content to be covered this book offers an objective view of the concept led approach The new focus on concepts represents a significant shift in how geography is to be taught in schools yet there has been little extended discussion of what a concept led approach to teaching and learning would entail This book fills that void by examining geography's key concepts and providing teachers with a theoretically robust and practical approach to curriculum planning using a concept led approach This is essential reading for all secondary geography teachers trainee teachers and anyone involved with education and curriculum planning

The Middle East and North Africa Alasdair Drysdale, 2024-10-15 This contemporary text the first in over a decade on the region presents the geography of the Middle East and North Africa defined as the Arab World Israel Turkey Iran and Afghanistan Thematically organized the book's eleven chapters focus on the region's physical and climatic setting demographic characteristics migration patterns religious and linguistic diversity political map offshore claims oil and gas resources and subregions and states Within this framework

Drysdale emphasizes pressing current problems the impact of climate change in a region where some areas already suffer from extreme summer heat and aridity the challenge of providing additional water in a region where per capita availability of freshwater is already the lowest in the world the impact of high fertility and rapid population growth in a fragile environment where economies are often unable to absorb young workers entering the labor force the looming prospect of an aging population the effects of out and in migration the diverse impact and role of Islam in daily and public life the integrative consequences of linguistic and ethnic diversity the evolution and imperfections of the political map ongoing territorial and boundary disputes that often have global repercussions external dependence on the region's prolific oil and gas resources and the extreme regional inequalities associated with their presence or absence This timely and insightful analysis is essential reading for students of the region who need a better understanding of key regional characteristics challenges and issues
