**Beyond Blue Skies** Chris Petty,2020-11 In 1945 some experts still considered

the so called sound barrier an impenetrable wall while winged rocket planes remained largely relegated to science fiction But

soon a series of unique rocket powered research aircraft and the dedicated individuals who built maintained and flew them began to push the boundaries of flight in aviation s quest to move ever higher ever faster toward the unknown Beyond Blue Skies examines the thirty year period after World War II during which aviation experienced an unprecedented era of progress that led the United States to the boundaries of outer space Between 1946 and 1975 an ancient dry lakebed in California s High Desert played host to a series of rocket powered research aircraft built to investigate the outer reaches of flight The western Mojave s Rogers Dry Lake became home to Edwards Air Force Base NASA s Flight Research Center and an elite cadre of test pilots Although one of them Chuck Yeager would rank among the most famous names in history most who flew there during those years played their parts away from public view The risks they routinely accepted were every bit as real as those facing NASA s astronauts but no magazine stories or free Corvettes awaited them just long days in a close knit community in the High Desert The role of not only the test pilots but the engineers aerodynamicists and support staff in making supersonic flight possible has been widely overlooked Beyond Blue Skies charts the triumphs and tragedies of the rocket plane era and the unsung efforts of the men and women who made amazing achievements possible
