## **World Civilizations Stearns Ap Edition:**

**World Civilizations**, 2011 World Civilizations AP Edition encourages students to grasp concepts and patterns across a huge breadth of time and space and helps to facilitate global understandings and connections in the classroom. This text captures a truly global approach by discussing and comparing major societies and focusing on their interactions. World Civilizations AP Edition presents a clear factual framework while stimulating analysis about global contacts, regional patterns, and the whole process of change and continuity on a world stage. This text identifies six periods in world history. Each period is determined by three basic criteria: a geographical rebalancing among major civilizational areas, an increase in the intensity and extent of contact across civilizations, or in the case of the earliest period, crossregional contact and the emergence of new and roughly parallel developments in many major civilizations. Based on comparative work and focuses on global processes, this text helps students see the history of the world as one based on multiple disciplines. Publisher: **World Civilizations**.

Peter N. Stearns, Michael Adas, Stuart B. Schwartz, 2001. The primary goal of World Civilizations is to present a TRULY GLOBAL HISTORY one that both discusses the development of the world's leading civilizations and also emphasizes the major stages in the interactions among different peoples and societies. World Civilizations examines all the world's civilizations, including those in the Western tradition but also those civilizations sometimes neglected in world history texts, for example, the nomadic societies of Asia, Latin America, and the nations and states of the Pacific Rim. World Civilizations balances this discussion of independent developments in all the world's major civilizations with comparative analysis of the results of international contact. World Civilizations organizes its presentation of global history into SIX COHERENT TIME PERIODS, with each period defined by the new and parallel patterns that evolved among all or most civilizations during the particular era. The six periods correspond to the six parts of the book. Within each part, the authors identify specific themes that characterize common experiences or common forces in individual societies as well as the new kinds and patterns of global contacts that emerged during the era. Thus, for example, Part I of the book discusses the developmental stage of world history, including the rise of

agriculture and the development of civilization Part II examines the classical era in global history an era marked by the integration of large regions and diverse groups of people through overarching cultural and political systems Subsequent parts of the book continue the emphasis on geographic shifts and the intensification of contact among civilizations *World Civilizations* Michael Adas, Peter N. Gilbert, Stuart B. Schwartz, 2007 The primary goal of World Civilizations is to present a truly global history since the development of agriculture and herding to the present Overview of World History Close your brown eyes Readers interested in the history and development of civilization worldwide *World Civilizations* Peter N. Stearns, Michael Adas, Stuart B. Schwartz, Marc Jason Gilbert, 2020 World history explores the human past around the globe to help us understand the world we live in today It seeks to identify how major forces have developed over time like patterns of migration or world trade It explores the cultures and political institutions of different regions to help explain commonalities and differences World history builds on a growing amount of historical scholarship some of which has truly altered the picture of the past It involves a rich array of stories and examples of human variety intriguing in themselves It helps develop skills that are vital not just to the history classroom but to effective

operation in a global society skills like comparing different societies appreciating various viewpoints identifying big changes and continuities in the human experience Always however it uses the past as a prologue to the present World historians argue that no one society past or present can be understood without reference to other societies and to larger global forces They argue even more vigorously that the present which clearly involves relationships that embrace the whole world cannot be grasped without a sense of the global historical record From its first edition *World Civilizations: The Global Experience* has aimed at capturing a truly global approach by discussing and comparing major societies and focusing on their interactions The goal is to present a clear factual framework while stimulating analysis about global contacts regional patterns and the whole process of change and continuity on a world stage This kind of world history focused on the development over time of the forces that shape the world today helps students make sense of the present and prepare to meet the challenges of the future It is hard to imagine a more important topic Embracing the whole world's history obviously requires selectivity and explicit points of emphasis This text gains coherence through decisions about time about place and about topic In all three cases the book encourages analysis relating facts to vital issues of interpretation Through analysis and interpretation students become active engaged learners rather than serving as passive vessels for torrents of historical facts Underpinning analysis the issues of time place and topic are the three keys to an intelligible global past
