Holt People, Places, and Change Robert J. Sager,2003 The Geography of Religion Roger W. Stump,2008-04-04 The only book of its kind this balanced and accessibly written text explores the geographical study of religion Roger W Stump presents a clear and meticulous examination of the intersection of religious belief and practice with the concepts of place and space He begins by analyzing the factors that have shaped the spatial distributions of religious groups including the seminal events that have fostered the organization of religions in diverse hearths and the subsequent processes of migration and conversion that have spread religious beliefs The author then assesses how major religions have diversified as they have become established in disparate places producing a variety of religious systems from a common tradition Stump explores the efforts of religious groups to control secular space at various scales relating their own uses of particular spaces and the meanings they attribute to space beyond the boundaries of their own communities Examining sacred space as a diverse but recurring theme in religious belief the book considers its role in religious forms of spatial behavior and as a source of conflict within and between religious groups Refreshingly jargon free and impartial this text provides a broad comparative view of religion as a focus of geographical inquiry National Geographic Concise History of the World Neil Kagan,2013 A chronology of world history ranges from the dawn of humankind to the present day examining important events milestones ideas and personalities that occurred simultaneously in different regions of the world **El-Hi Textbooks & Serials in Print, 2005** ,2005 **The Perdiccas Years, 323-320 BC** Tristan Hughes,2022-03-18 This ancient military history examines how the Macedonian empire descended into a maelstrom of violent rivalry after the death of Alexander When Alexander the Great died in Babylon in 323 BC he left behind one of the largest empires the world had seen stretching from Greece to the Punjab Surrounding the king s deathbed were his highest subordinates some of the greatest military minds of antiquity each with their own insatiable ambitions for power Since Alexander died leaving no clear successor these former brothers in arms quickly became fierce foes as they vied for dominance What followed was an extraordinary time for military campaigns Powerful warlords and warrior queens attempted to assert their authority throughout the length and breadth of Alexander the Great s former empire from Afghanistan to Athens from Africa to Asia powerful armies decided matters by the spear In this volume historian Tristan Hughes looks at the initial years of the conflict and several major campaigns that immediately seized the kingdom Geopolitics and International Relations ,2021-12-13 Although we live in a globalised world territorially embedded factors are highly relevant in such domains as security economy energy environment politics

diplomacy Today's analysts of world affairs are often loosely referring to geopolitics but do not always clearly define it. This book therefore offers a necessary framework, an introduction into the main components of geopolitical analysis, an overview of the main geopolitical schools of thought as well as reflections on how technology and geopolitics affect each other in economy, energy and security. In addition, several empirical studies are showcased, each developing innovative approaches. Leading authors reflect upon containment, analyse geopolitical myths, research geoeconomic rivalries, study mental maps, analyse conflict through territorially embedded variables, greed motivations and apply neo-medievalism to study sub-state diplomacy. Contributors include David Crikemans, Gyula Csurgai, Luis da Vinha, Manuel Duran, Alexandre Lambert, Antonios Nestoras and Steven Spittaels. *Guide to U.S. Environmental Policy* Sally K. Fairfax, Edmund Russell, 2014-08-14. *Guide to U.S. Environmental Policy* provides the analytical connections showing readers how issues and actions are translated into public policies and persistent institutions for resolving or managing environmental conflict in the U.S. The guide highlights a complex decision-making cycle that requires the cooperation of government, business and an informed citizenry to achieve a comprehensive approach to environmental protection. The book's topical, operational and relational essays address development of U.S. environmental policies, the federal agencies and public and private organizations that frame and administer environmental policies and the challenges of balancing conservation and preservation against economic development, the ongoing debates related to turning environmental concerns into environmental management and the role of the U.S. in international organizations that facilitate global environmental governance. **Key Features:** 30 essays by leading conservationists and scholars in the field investigate the fundamental political, social and economic processes and forces driving policy decisions about the protection and future of the environment. Essential themes traced through the chapters include natural resource allocation and preservation, human health, rights of indigenous peoples, benefits of recycling, economic and other policy areas impacted by responses to green concerns, international cooperation and immediate and long-term costs associated with environmental policy. The essays explore the impact made by key environmental policymakers, presidents and politicians as well as the topical issues that have influenced U.S. environmental public policy from the colonial period to the present day. A summary of regulatory agencies for environmental policy, a selected bibliography and a thorough index are included. This must have reference for political science and public policy students who seek to understand the forces that U.S. environmental policy is suitable for academic, public, high school, government and professional libraries.

In *Making History Mine*, Sarah Cooper shows teachers how to use thematic instruction to link skills to content knowledge. By combining thought-provoking activities and rich assessments, Sarah encourages teachers to challenge students to make history personal and relevant to their lives. **The Geopolitics of**

Domination Geoffrey Parker, 2014-10-03 Using the examples of the Ottoman Empire Spain Austria France and Germany this book describes the principal geopolitical features of the expansionist state It then presents a model of the operation of the expansionist process over space and time It goes on to apply the geopolitical characteristics of the model to the period after 1945 in order to assess the extent to which the Soviet Union might be considered as being an expansionist state either actually or potentially This latter question is obviously once more extremely relevant with the current events in Ukraine
