Effective Conservation Science Peter Kareiva, Michelle Marvier, Brian Silliman, 2017-10-06 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book's principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 2013-11-11 The Encyclopaedia fills a gap in both the history of science and in cultural studies Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures science Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas The Western academic divisions of science technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision

of today There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does xi PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa **s8dyaf8b** Podgor, Ellen, Cancer and its Management Jeffrey S.
