

WORLDCHANGING

A USER'S GUIDE FOR THE 21ST CENTURY

"We need a generation of everyday heroes . . . [t]his book belongs in the library of every person who aspires to be part of that generation."

—From the foreword by Al Gore, recipient of The Nobel Peace Prize

"*Worldchanging* is a fascinating book—smart, surprising, and full of energy. Read it; it may change your life."

—Elizabeth Kolbert, author of *Field Notes from a Catastrophe*

"*Worldchanging* is quirky, fun and full of surprises, even for seasoned eco-readers."

—*Chicago Tribune*

"If I were you, I would go out this very moment and get a copy of *Worldchanging*. Indeed, it is a gold mine of sound, sustainable, green advice."

—*New Statesman*

"*Worldchanging* is jam-packed with positive, successful projects and tools from around the world. The result is almost overwhelmingly inspiring."

—*The Globe & Mail*

"If *Worldchanging* is any indicator, the new green movement is globally aware, technically savvy, design conscious and, above all, optimistic."

—*Wired*

"Keep this book beside your bed or bath, and skim through its pages whenever you need to be re-enthused about the future."

—*The Guardian*

Sustainable Design Daniel A. Vallero, Chris Brasier, 2008-04-25 Scientific Principles to Guide Sustainable Design

Decisions From thermodynamics to fluid dynamics to computational chemistry this book sets forth the scientific principles underlying the need for sustainable design explaining not just the hows of sustainable design and green engineering but also the whys Moreover it provides readers with the scientific principles needed to guide their own sustainable design decisions Throughout the book the authors draw from their experience in architecture civil engineering environmental engineering planning and public policy in order to build an understanding of the interdisciplinary nature of sustainable design Written to enable readers to take a more scientific approach to sustainable design the book offers many practical features including Case studies presenting the authors firsthand accounts of actual green projects Lessons learned from Duke University's Smart House Program that demonstrate the concepts and techniques discussed in the book Exercises that encourage readers to use their newfound knowledge to solve green design problems Figures tables and sidebars illustrating key concepts and summarizing important points For architects designers and engineers this book enables them to not only implement green design methods but also to choose these methods based on science With its many examples case studies and exercises the book is also an ideal textbook for students in civil and environmental engineering construction and architectural engineering

Renaissance in the Tropics Mario Calderón Rivera, GAVIOTAS For the recovery of Earth's skin There is a new start towards the world One age that Mario Calderon Rivera outstanding thinker and humanist called Renaissance in the sense of both the Italian Renaissance as a change of mind of man to himself and the contemporary one as a change of mind from man towards nature The Renaissance led by this brilliant saying of Leonardo da Vinci Everything comes from everything and everything is made out of everything and everything returns into everything especially in a round planet This also comes to be true in Centro Las Gaviotas where they achieved among other things the reawakening of the Amazon rainforest in the Colombian savannas of Orinoco There they join the community welfare with the wealth generated by the sustainable use of tropical biodiversity which being located in the equatorial zone has one of the highest rates of biological productivity Within this context Mario Calderon travels through the last 60 years showing the ideas of the human being when he began to reflect on the effects of his action on Earth They consist of a new attitude towards nature seeing himself as being part of one system with it he can coexist without destroying understanding their connections i.e. its complexity Gaviotas age is this way of thinking The author in honor of Gaviotas and its founder Paolo Lugari sets the theoretical foundations of the progress mankind has made in this respect since the last half century Gaviotas is an example a path but at the same time an outpost of a bioculture that makes its way to protect both human life as well as that from others which ultimately are subjected to the recovery of the vegetable skin of Earth by the increase in biomass as this determines the dynamic stability of the composition of the atmosphere of 99% of nitrogen and oxygen If this composition would be disturbed by the continuing decline in biomass

it would make impossible for human life to exist something much more serious than global warming Just warming is only a reductionist analysis of the issue Development is seen now in productive harmony with nature without undermining the very foundations of civilization With an extensive knowledge of the authors who have made the ecological thinking trends of our time Calder n contextualizes Gaviotas in the present world highlighting its conceptual contributions and its innovative achievements always pointing to a decent lifestyle without denying the modernity

Our Environmental Handprints Jon R. Biemer, 2021-05-05 Readers should be inspired informed and ready to go Booklist Starred Review Offers 175 actions readers can take to create a more sustainable global environment You care about the environment the world you live in and the world you are going to leave behind for future generations Perhaps you already avoid wasting energy and buying more things than you need reducing your Ecological Footprint Yet there is a limit given your family and circumstances What can you do that will truly help heal our planet Our Environmental Handprints is the first book to fully explore your Handprint how you can create sustainability in your life and in the world Your Handprint is limited only by your imagination The good you do can be greater than your Footprint It is time to put more energy into your Handprint The smart beauty of the Handprint is that it can be self-perpetuating Take planting a tree as an example You put a seedling into the ground water it and then leave it alone That tree will then grow itself and pull carbon dioxide from the air and create oxygen for us to breathe for as long as it lives And seeds from that tree create more trees Here Jon Biemer draws our attention to proven strategies across the spectrum We make a difference with the choices we make about the clothing we buy the investments we make and even the food we choose to eat Handprint Thinking applies to shelter eco remodeling and LEED buildings motion electric cars and living without a car and earth friendly energy He provides 175 proven Handprint suggestions that will help readers align their interests lifestyle and motivations toward a more sustainable earth
