Manual of Embryo Selection in Human Assisted Reproduction Catherine Racowsky, Jacques Cohen, Nicholas Macklon, 2023-01-26. Selecting the best embryo to transfer to the uterus is key to successful in vitro fertilization (IVF). A huge amount of research has been devoted to this topic, and there are numerous methods used, from simple morphological assessment to molecular biological techniques to assess the genome and metabolism of the newly fertilized embryo. For many of these techniques, an adequate evidence base is lacking, and expert opinion is valuable. Clinical imperatives require ranking all embryos in a cohort according to their viability, thereby enabling the selection of the best embryo to optimize live birth outcome, a key indicator used to measure and rate IVF Clinics worldwide. This clear and informative manual will provide embryologists and clinicians with an overview of the tools now available to assist in embryo selection, as well as evidence for their efficacy and safety, and the broader considerations that must underlie these important clinical decisions.

Putting Responsible Research and Innovation into Practice Vincent Blok, 2022-10-13. This Open Access book builds on the experiences of one of the largest European projects in the domain of responsible Research and Innovation (NewHoRRizon). It highlights the potential of and opportunity in responsible R I to conduct innovation in a socially responsible way. Employing the methodology of Social Labs, the book analyses responsible R I from an experience-based viewpoint and further explores the application of responsible R I beyond scholarly and industrial interests. The contributors analyze the current European R I landscape, provide reflection and reconceptualization of its core concepts, and project future challenges in relation to responsible R I. The book complements the readers' line of work by providing insights on how responsible R I can be applied by the audience, for example, in their decision-making processes.
