the Occult USA Author Nevill Drury Managing the Unknown Frank Uekötter, Uwe Lübken, 2014-03-01 Information is crucial when it comes to the management of resources But what if knowledge is incomplete or biased or otherwise deficient How did people define patterns of proper use in the absence of cognitive certainty Discussing this challenge for a diverse set of resources from fish to rubber these essays show that deficient knowledge is a far more pervasive challenge in resource history than conventional readings suggest Furthermore environmental ignorance does not inevitably shrink with the march of scientific progress these essays suggest more of a dialectical relationship between knowledge and ignorance that has different shapes and trajectories With its combination of empirical case studies and theoretical reflection the essays make a significant contribution to the interdisciplinary debate on the production and resilience of ignorance At the same time this volume combines insights from different continents as well as the seas in between and thus sketches outlines of an emerging global resource history *The United Nations World Water Development Report* UNESCO World Water Assessment Programme, 2021-03-22 Water is a finite and non substitutable resource As the foundation of life societies and economies it carries multiple values and benefits But unlike most other natural resources it has proven extremely difficult to determine its true value The 2021 edition of the United Nations World Water Development Report titled Valuing Water assesses the current status of and challenges to the valuation of water across different sectors and perspectives and identifies ways in which valuation can be promoted as a tool to help improve its management and achieve global sustainable development
