**Preparing for War: The Making of the 1949 Geneva Conventions** Boyd van Dijk, 2022-02-03. The 1949 Geneva Conventions are the most important rules for armed conflict ever formulated. To this day, they continue to shape contemporary debates about regulating warfare, but their history is often misunderstood. For most observers, the drafters behind these treaties were primarily motivated by liberal humanitarian principles and the shock of the atrocities of the Second World War. This book tells a different story, showing how the final text of the Conventions far from being an unabashedly liberal blueprint was the outcome of a series of political struggles among the drafters. It also concerned a great deal more than simply recognizing the shortcomings of

international law revealed by the experience of war To understand the politics and ideas of the Conventions drafters is to see them less as passive characters responding to past events than as active protagonists trying to shape the future of warfare In many different ways they tried to define the contours of future battlefields by deciding who deserved protection and what counted as a legitimate target Outlawing illegal conduct in wartime did as much to outline the concept of humanized war as to establish the legality of waging war itself Through extensive archival research and critical legal methodologies Preparing for War establishes that although they did not seek war the Conventions drafters prepared for it by means of weaving a new legal safety net in the event that their worst fear should materialize a spectre still haunting us today Battlegroup! Jim Storr, 2021-11-03 What can we learn from the unfought battles of the Cold War Could any supposed British superiority at the unit level or superior American equipment and technology have as much effect on a possible Warsaw Pact attack as the Bundeswehr's apparent mastery of formation tactics The Cold War dominated the global events for over 40 years Much of the world genuinely believed that a nuclear war might break out at any moment Millions of men were involved National budgets strained to equip and sustain them Much of Europe had to endure conscription tank convoys clogging up the roads low flying jet aircraft and large scale mobilization exercises But what do we really know about the Cold War More importantly what can we learn from it Battlegroup investigates the unfought land battles of the Cold War on the Central Front It focusses on the 1980s It looks solely at high intensity conventional warfare largely from NATO's perspective It concentrates on the lower tactical levels from company to brigade or perhaps division It considers the tactics organization and equipment and of the American British West German French and Soviet armies The book discusses what battles would have been fought then how they would have been fought and lastly what we can learn from that The first section looks at the strategic and operational setting and the armies involved The second section looks at the components of a land force how those components were organized and would fight and assembles them into battlegroups brigades and divisions Battlegroup then steps through the tactics of land warfare delay defense and withdrawal advance attack and counterattack fighting in woods built up areas and at night and air support to land operations The final section of the book illustrates some of the possible early engagements of any war on the Central Front It then draws out the major observations and conclusions Battlegroup relies heavily on two previously untapped sources virtually unknown to English speaking audiences They explain much of the Bundeswehr's highly individual approach to defeating a potential Warsaw Pact attack This is not a counterfactual history It does not attempt to say who would have won the Third World War It explodes some myths It will be uncomfortable reading for some and contentious in places Battlegroup will be essential reading for anyone interested in warfare of the last decade of the Cold War be it as a professional an academic or a wargamer Churchill and Fisher Barry Gough, 2017-10-06 A vivid study of the politics and stress of high command this book describes the decisive roles of young Winston Churchill as political head of the Admiralty during the First World War Churchill was locked together in a perilous destiny with the ageing British Admiral Jacky Fisher

the professional master of the British Navy and the creator of the enormous battleships known as Dreadnoughts Upon these Titans at the Admiralty rested British command of the sea at the moment of its supreme test the challenge presented by the Kaiser's navy under the dangerous Admiral Alfred von Tirpitz Churchill and Fisher had vision genius and energy but the war unfolded in unexpected ways There were no Trafalgars no Nelsons Press and Parliament became battlegrounds for a public expecting decisive victory at sea An ill fated Dardanelles adventure by ships alone as Churchill determined on top of the Zeppelin raids on Britain brought about Fisher's departure from the Admiralty in turn bringing down Churchill They spent the balance of the war in the virtual wilderness This dual biography based on fresh and thorough appraisal of the Churchill and Fisher papers is a story for any military history buff It is about Churchill's and Fisher's war how each fought it how they waged it together and how they fought against each other face to face or behind the scenes It reveals a strange and unique pairing of sea lords who found themselves facing Armageddon and seeking to maintain the primacy of the Royal Navy the guardian of trade the succour of the British peoples and the shield of Empire

**Sisters in Peace** Kate Laing, 2023-11-03 Is preparing for war the best means of preserving peace In *Sisters in Peace* Kate Laing contends that this question has never been solely the concern of politicians and strategists She maps successive generations of twentieth century women who were eager to engage in political debate even though legislative and cultural barriers worked to exclude their voices In 1915 during the First World War the Women's International Congress at The Hague was convened after alarmed and bereaved women from both sides of the conflict insisted that their opinions on war and the pathway to peace be heard From this gathering emerged the Women's International League for Peace and Freedom WILPF which to this day campaigns against militarism and nuclear weapons In Australia the formation of a section of WILPF connected political women to a worldwide network that sustained their anti war activism throughout the last century In examining the rise of WILPF in Australia *Sisters in Peace* provides a gendered history of this country's engagement with the politics of internationalism This is a history of WILPF women who committed to peace activism even as Australia's national identity and military allegiances shifted over time a history that has until now been an overlooked part of the Australian peace movement
