The New World History Ross E. Dunn, Laura J. Mitchell, Kerry Ward, 2016-08-23 *The New World History* is a comprehensive volume of essays selected to enrich world history teaching and scholarship in this rapidly expanding field. The forty-four articles in this book take stock of the history, evolving literature, and current trajectories of new world history. These essays, together with the editors' introductions to thematic chapters, encourage educators and students to reflect critically on the development of the field and to explore concepts, approaches, and insights valuable to their own work. The selections are organized in ten chapters that survey the history of the movement, the seminal ideas of founding thinkers, and today's practitioners changing concepts of world, historical space and time, comparative methods, environmental history, the big history movement, globalization debates over the meaning of Western power, and ongoing questions about the intellectual premises and assumptions that have shaped the field.

A History of Modern Psychology David C. Ludden, Jr., 2025-05-28 *A History of Modern Psychology: The Quest for a Science of the Mind* describes the evolution of psychology into the twenty-first century with coverage of recent events and findings that transform our understanding of the past. With a topical approach that presents key thinkers within the context of schools of thought, students are able to see how philosophers, researchers, and academics influenced one another to create the rich and diverse landscape of modern psychology in a global context. In the new Second Edition, the author expands coverage of unsung pioneers: philosopher Al Balkhi, zoologist Charles Henry Turner, psychiatrist Grunya Sukhareva, and others. He revisits the legacy of Francis Galton, explores the Vygotsky boom, and includes new discussion of the impact of Philip Zimbardo's Stanford Prison Experiment. Through detailed timelines and features such as Looking Back and Looking Ahead, Ludden gives students a deeper appreciation for the transference of knowledge that shaped the field.

Anthropology and Global History Robert M. Carmack, 2013-10-11 *Anthropology and Global History* explains the origin and development of human societies and cultures from their earliest beginnings to the present, utilizing an anthropological lens but also drawing from sociology, economics, political science, history, and ecological and religious studies. Carmack reconceptualizes world history from a global perspective by employing the expansive concepts of world systems and civilizations and by paying deeper attention to the role of tribal and native peoples within this history. Rather than concentrating on the minute details of specific great events in global history, he shifts our focus to the broad social and cultural contexts in which they occurred. Carmack traces the emergence of ancient kingdoms and the characteristics of pre-modern empires as well as the processes by which the modern world has become integrated and transformed. The book addresses Western civilization as well as comparative processes which have unfolded in Asia, the Middle East, Latin America, and sub-Saharan Africa. Vignettes opening each chapter and case studies integrated throughout the text illustrate the numerous and often extremely complex historical processes which have operated through time and across local, regional, and global settings.

Bernadine E. Ahonkhai, ED. D, 2025-01-06 UNTOLD HISTORY illustrates how African history is intertwined with and foundational to American history. The book begins this narrative in the fourteenth century when European seafarers discovered the coastal regions of Africa, describes the meeting of the three worlds: aEUR Europe, Africa, and the New World, later known as America, and details the increasing interactions of the three worlds after the 1450s. The author dispels some of the misconceptions about pre-colonial Africa by presenting the history and culture of the African continent from a distinctively African lens. As such, this book chronicles some prominent African empires and kingdoms, Africa-European bilateral trade relations, the trans-Atlantic Slave trade, and contemporary Africans in the United States. The book highlights stories of contemporary Africans residing in the United States and documents the contributions of early and contemporary Africans to the history, economic development, culture, and prominence of the United States of America. It concludes with a snapshot of contemporary Africa. The book provides a framework for understanding the history of Africa prior to the arrival of European merchants on its shores, African civilizations, cultures, legacy, and contributions to America. Educators can use the book to supplement their course on American History, World History, African American History, in pre-collegiate or collegiate settings. This book can help educators to reimagine the teaching and learning of the United States history by centering on important narratives in Africa and with Africans in the American diaspora. The book is organized chronologically and can help the reader to understand the past as it relates to the present world. To facilitate teaching, each chapter opens with a quotation that introduces the content of the chapter and ends with study discussion questions that educators can use or adapt as appropriate for instruction and to ensure full comprehensive understanding of the content presented. **Clinical**
