

AP WORLD HISTORY STUDY GUIDE

Unit 1 (1200-1450):

1.1: State Building in China

- China was kind of like the Texas of the ancient world: Don't mess with China.
- In 960, China was split into regional kingdoms again as the power of the Tang Dynasty was gradually waning. Zhao Kuangyin: ruler of one of those kingdoms that took it upon himself to unify most of them all again as the Song Dynasty. (960-1279)
- Song State Structure: 6 departments
 - Personnel, finance, rites, army, justice, and public works.
 - Censorate overseeing these departments. Made sure no one in these bureaucratic departments were behaving bad.
- Confucianism: chief things that helped organize the government.
 - Great continuity in Chinese culture over the years
 - According to Confucian thought, reality is fundamentally hierarchical. Everyone has their place in society, and everyone needs to behave rightly and fulfill their role for everything to go well. (People subject to rulers, etc.)
- Civil service examination:
 - Influenced by Confucian ideals. Major part of the exam was being WELL VERSED in Confucian ideals.
 - A test you had to pass in order to work in the imperial bureaucracy.
 - Led ruling from a heretic form of aristocracy to a new class of scholarly leaders
 - Aristocracy: a form of government in which power is held by the nobility.
- Chinese merchants participated heavily in robust system of long-distance trade across Afro-Eurasia.
 - Increasingly commercialized Chinese society. People began to produce goods not only for local consumption, but also for distant markets. Chinese manufacturing FLOURISHED during this period.
- By the 11th century, China's iron industry was producing 32,000 suits of armor and 16 million iron arrowheads ANUALLY.
- As commerce grew, role of money also changed. As economy grew, there was not enough precious metal available for minting coins to keep up with the demand.
 - Introduction of paper money
 - Became more popular than minting coins
- Gunpowder
 - Accidental discovery by Daoist alchemists trying to discover elixir of immortality.
 - First application was fireworks and pyrotechnic displays for imperial court, not in a military context.
 - Military context next.
- Influenced Japan
 - Chinese influence was all over Japanese culture.

present day *The Patchwork of World History in Texas High Schools* Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

same time has the world become more interconnected and globalized How is this world characterized by growing gaps in wealth poverty and inequality Sharp and accessible Eric Vanhaute s introduction to this exciting field demonstrates that world history is more of a perspective than a single all encompassing narrative an instructive new way of seeing thinking and doing It is an essential resource for students of history in a global context

The Material of World History Tina Mai Chen,David S. Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes

The Oxford Handbook of the History of Education John L. Rury,Eileen Tamura,2019 This handbook offers a global perspective on the historical development of educational institutions systems of schooling educational ideas and educational experiences Its 36 chapters consider the field s changing scholarship while examining particular national and regional themes and offering a comparative perspective Each also provides suggestions for further research and analysis

The Diffusion of "Small" Western Technologies in the Middle East Uri M.

Kupferschmidt,2023-10-04 In recent years we have become interested in the diffusion of small Western technologies in the countries of the Middle East during the 19th and 20th centuries the era of Imperialism and first globalization We postulated a contrast between small and big technologies Under the latter category we may understand railway systems electricity grids telegraph networks and steam navigation imposed by foreign powers or installed by connected local entrepreneurs But many small Western technologies such as sewing machines typewriters pianos eyeglasses and similar consumer goods which had been developed and manufactured in Europe and America were wanted and willingly acquired by the agency of individual users elsewhere In a few cases however the inventions had to be adapted or were overstepped and even delayed Some were

adopted as social markers or status symbols only by elites who could afford them Processes of adoption and diffusion therefore differed according to cultural settings preferences and needs Social and cultural historians and social scientists not only of the Middle East will find in this collection of essays a new approach to the impact of Western technological inventions on the Middle East *Catalog of Copyright Entries.
