Embree, Carol Gluck, 2015-05-20 A guide aimed at introducing students to the history of Asia in conjunction with Western and world history The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the

depiction of non Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States An Atlas and Survey of South Asian History Karl J.

and shared     *A Primer for Teaching World History* Antoinette Burton, 2012 This book offers principles to consider when creating a world history syllabus it prompts a teacher rather than aiming for full world coverage to pick an interpretive focus and thread it through the course It will be used by university faculty graduate students and high school teachers who are teaching world history for the first time or want to rethink their approach to teaching the subject     World History through Case Studies David Eaton, 2019-09-19 This innovative textbook demystifies the subject of world history through a diverse range of case studies Each chapter looks at an event person or place commonly included in comprehensive textbooks from prehistory to the present and from across the globe from the Kennewick Man to gladiators and modern day soccer and globalization and digs deeper examining why historians disagree on the subject and why their debates remain relevant today By taking the approach of unwrapping the textbook David Eaton reveals how historians think making it clear that the past is not nearly as tidy as most textbooks suggest Provocative questions like whether ancient Greece was shaped by contact with Egypt provide an entry point into how history professors may sharply disagree on even basic narratives and how historical interpretations can be influenced by contemporary concerns By illuminating these historiographical debates and linking them to key skills required by historians *World History through Case Studies* shows how the study of history is relevant to a new generation of students and teachers
