Allemann, Anton Jäger, Valentina Mann, 2020-06-09. This volume takes a fresh approach to the issue of space in intellectual history and puts forward novel ways of rendering conceptions of space useful for historians of political thought. Notions of space have become increasingly important to the practice of intellectual historians in recent years. This is evidenced by emerging locutions such as the international turn, global intellectual history and political space. Thus far, however, it is still unclear what it actually means to take space seriously in intellectual history and what we might gain from doing so. Ranging from the early modern period to the twentieth century, the contributions to this volume span a variety of diverse topics and showcase the rewards of a spatial focus in intellectual history, both as a kind of place and as an organising principle. The book reconstructs the role of the modern territorial state in grounding reflection on political legitimacy; the interface between oceans and empires as a source of political reflection; and the curious antecedents of today's spatial turn in German and Indian visions of geopolitics in the interwar years. In doing so, it makes a contribution to an ever-growing field. This book was originally published as a special issue of *Global Intellectual History*. **The Cambridge World History: Volume 5, Expanding Webs of Exchange and Conflict, 500CE-1500CE** Benjamin Z.
