

History Of The World Wide Web

1. The internet was developed in the 1960s by the US Department of Defense as a communication network for the military.
2. In the 1980s, Tim Berners-Lee, a British computer scientist working at CERN, the European Particle Physics Laboratory, developed the concept of the World Wide Web.
3. Berners-Lee wanted to create a system that would allow scientists to share research papers and collaborate on projects.
4. In 1990, he developed the first web server and the first web browser, called World Wide Web, on a NeXT computer.

Replicating Microfinance in the United States James H. Carr,Zhong Yi Tong,2002-06-28 Microfinance was pioneered in the developing world as the

lending of small amounts of money to entrepreneurs who lacked the kinds of credentials and collateral demanded by banks. Similar practices spread from the developing to the developed world reversing the usual direction of innovation and today several hundred microfinance institutions are operating in the United States. Replicating Microfinance in the United States reviews experiences in both developing and industrialized countries and extends the applications of microlending beyond enterprise to consumer finance, housing finance and community development finance concentrating especially on previously underserved households and their communities.

Underground Gas Storage D. J. Evans, R. A. Chadwick, 2009. The UK became a net importer of natural gas in 2004 and by 2020 will import up to 90% of its requirements leaving it vulnerable to increasing energy bills and risk of disruption to supply. New pipelines to Europe and

improvements to interconnectors will meet some demand but Government recognises the need for increased gas storage capacity best met by the construction of underground storage facilities Energy security has also raised the likelihood of a new generation of coal fired power stations which to be environmentally viable will require clean coal technologies with near zero greenhouse gas emissions A key element of this strategy will be underground CO₂ storage This volume reviews the technologies and issues involved in the underground storage of natural gas and CO₂ with examples from the UK and overseas The potential for underground storage of other gases such as hydrogen or compressed air linked to renewable sources is also reviewed
