**The Art of Failure** Jesper Juul, 2016-09-02 A gaming academic offers a fascinating

exploration of why we play video games despite the unhappiness we feel when we fail at them Boston Globe We may think of video games as being fun but in *The Art of Failure* Jesper Juul claims that this is almost entirely mistaken When we play video games our facial expressions are rarely those of happiness or bliss Instead we frown grimace and shout in frustration as we lose or die or fail to advance to the next level Humans may have a fundamental desire to succeed and feel competent but game players choose to engage in an activity in which they are nearly certain to fail and feel incompetent So why do we play video games even though they make us unhappy Juul examines this paradox In video games as in tragic works of art literature theater and cinema it seems that we want to experience unpleasantness even if we also dislike it Reader or audience reaction to tragedy is often explained as catharsis as a purging of negative emotions But Juul points out this doesn't seem to be the case for video game players Games do not purge us of unpleasant emotions they produce them in the first place What then does failure in video game playing do Juul argues that failure in a game is unique in that when you fail in a game you not a character are in some way inadequate Yet games also motivate us to play more in order to escape that inadequacy and the feeling of escaping failure often by improving skills is a central enjoyment of games Games writes Juul are the art of failure the singular art form that sets us up for failure and allows us to experience it and experiment with it *The Art of Failure* is essential reading for anyone interested in video games whether as entertainment art or education
