Maternal and Newborn Care Joanita De Kock, Christa Van der Walt, 2004 The midwife's role is examined in the community and family health context in this handbook on effective maternal and newborn care for midwives and other healthcare providers The skills competencies and knowledge required to make informed decisions about neo and postnatal care are covered including anatomy and the physiology of reproduction high risk pregnancies and labor and birth Theoretical and practical issues illuminate a midwife's role in the prevention of illness in mothers and babies with attention to the unique challenges of midwifery in developing nations Insights from current research studies and critical questions about midwife practice will help those new to health care understand the unique challenges of this form of health service delivery **My career**, 1996 **Kontak**, 1992 *The Nurse Educator in Practice* Salomé M. Meyer, Susan E. Van Niekerk, 2008 There is a great need for qualified nurse educators in South Africa to enhance the quality of the development of student nurses and therefore to enhance the quality of nursing care This book applies didactics in theoretical as well as clinical nursing education using examples to illustrate the text **Contac**, 1998 **Questions and Replies of the National Assembly** South Africa. Parliament (1994-). National Assembly, 2002 *COHESA Directory*, 1997 **Learn and Teach**, 1988

South African Human Sciences Research Networking Directory, 1996 *Navorsingsverslag*, 1994 **Mentoring in Nursing through Narrative Stories Across the World** Nancy Rollins Gantz, Thóra B. Hafsteinsdóttir, 2023-07-15 The book explores how mentoring theoretical background of mentoring and how mentoring is used by nurses in all arenas where they work in health care education research policy politics and academia in supporting nurses with their professional and career development Over 300 mentors and mentees from a wide range of countries across all continents share their stories of mentoring reflecting on their development in leadership clinical practice education research and politics The book describes various types of mentoring including more traditional types of mentoring as well as virtual online and peer mentoring During the mentorship trajectories the nurses address an inclusive collection of issues that they are faced with and share supporting strategies The book highlights the importance of mentoring for nurses to support their personal and professional leadership development Also it emphasizes the importance of mentoring for when nurses engaged in variety of projects that could entail or encompass evidence based clinical practice development within education research in the clinical arena policy formation political affairs or cultural inclusion that present significant impact in patient care and healthcare outcomes within and across countries With The Future of Nursing 2020 2030 Charting a Path to Achieve Health Equity report from the National Academies of Sciences published in 2021 the role of nursing will become ever more dynamic and therefore the profession of nursing must be visible in improving and securing the future for patients families and communities across the globe Mentoring practices to build the profession's leaders are forever essential acute and imperative This book shows how mentoring can support nurses in further developing nursing as a profession and scientific discipline across countries to

support clinical application of evidence based practice and nursing education and research dissemination Accordingly this book shares essential diverse and pioneering expertise through wide range of narrative stories that will benefit nurses at all years of experience from early career nurses emerging leaders nurse educators leaders policy makers and nurse scientists around the globe The nursing profession must magnify its position in health care and nurses need to proliferate their contributions throughout the globe They can accomplish that through mentoring and growing and nurturing other nurses to advance and thrive in today s world Working with indigenous knowledge Fhumulani M. Mulaudzi, Rachel T. Lebesse, 2022 The aim of the book is to assist both local and international scholars in articulating the scholarly discourse on indigenous health attitudes practices and experiences The indigenous lens that was used to generate and disseminate indigenous knowledge in this book will strengthen indigenous scholarship thus making it accessible to a wider audience In addition the information shared in this book will add value for scholars and assist them with the indigenous knowledge needed to address sustainable development goals This book is timeous and topical as the discourse on the decolonisation of the curriculum is widely debated in the higher education space The discourse on the scholarship of indigenous knowledge as the tacit local knowledge that stems from cultural practices within communities has not been well articulated in the current health science education milieu Indigenous knowledge has remained overlooked and undermined for a very long time and the information remains untapped in local communities The scholars who conducted the research on which this book is based unearthed a wealth of knowledge which was tacit in nature and translated it into implicit knowledge that can be documented and shared with other scholars globally This knowledge will assist health care scholars in benefiting from knowledge practices and cultural beliefs that will assist them in health care planning teaching evidence based practice and further research
