Shaffer Annular Manual:

Kicks and Blowout Control Neal Adams, Larry Kuhlman, 1994 The original 1980 release Well Control Problems and Solutions was the most advanced well control document of its time. It was the basis for the first well control school ever certified by regulatory authority under current guidelines. The many well control and blowout control achievements over the last 15 years necessitated the publishing of this second edition. Kicks and Blowout Control is the most complete book available on kicks, blowouts and related well control topics. It contains state of the art kick handling procedures and is the most advanced and complete reference on blowouts. No other book in today's industry offers the comprehensive nature of this text.

Well Control for Completions and Interventions Howard Crumpton, 2018-04-04 Well Control for Completions and Interventions explores the standards that ensure safe and efficient production flow, well integrity and well control for oil rigs focusing on the post Macondo environment where tighter regulations and new standards are in place worldwide. Too many training facilities currently focus only on the drilling side of the well's cycle when teaching well control, hence the need for this informative guide on the topic. This long-awaited manual for engineers and managers involved in the well completion and intervention side of a well's life covers the fundamentals of design, equipment and completion fluids. In addition, the book covers more important and distinguishing components such as well barriers and integrity envelopes, well kill methods specific to well completion and other forms of operations that involve completion like pumping and stimulation including hydraulic fracturing and shale coiled tubing wireline and subsea intervention. Provides a training guide focused on well completion and intervention. Includes coverage of subsea and fracturing operations. Presents proper well kill procedures. Allows readers to quickly get up to speed on today's regulations post Macondo for well integrity barrier management and other critical operation components.
