*The Routledge Handbook of Architecture, Urban Space and Politics, Volume I* Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century, we cannot merely reignite the approaches of thought and design that were operative in the last century. This is

despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematics Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license

*The New Laws of Outer Space* Ugo Pagallo,2024-11-14 This book maps out the moral legal and societal issues brought forth by the use of autonomous systems such as AI and smart robots in outer space Humanity is on the brink of a new space era in which projects for permanent human colonies on the Moon and space missions with autonomous AI systems will soon become a reality Principles and provisions of international space law fall increasingly short in tackling this scenario Experts and institutions have recommended improvements to the legal framework such as new international agreements or policies that would not require any amendment to conventional law Most of the time such proposals and recommendations overlook the challenges posed by technology and how autonomous and intelligent systems in outer space require moral and legal standards of their own This book argues that the traditional focus on satellite communications space related services and the appropriability of celestial resources needs to be integrated by new laws of outer space regulating cybersecurity law and environmental law data governance and consumer protection The new laws of outer space will increasingly concern the development of new standards for the behaviour and decision making of AI systems

and smart robots with and without humans aboard deep space missions and in next generation colonies What laws shall govern us out there in a new terra incognita This is the question that the book sets out to answer
