Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor s reductionist tendencies **Let's spend the night together** Subcultures

Network, 2023-11-07 Let s spend the night together explores how sex and sexuality provided essential elements of British youth culture in the 1950s through to the 1980s It shows how the underlying sexual charge of rock n roll and pop music more generally was integral to the broader challenge embodied in the youth cultures that developed after World War Two As teenage hormones rushed to move to the music and take advantage of the spaces opening up through consumption education and employment so the boundaries of British morality and cultural propriety were tested and often transgressed Be it the assertive masculinity of the teds or the lustful longings of the teeny bopper the gender bending of glam or the subterranean

allure of an underground club disco the free love of the 1960s or the punk provocations in the 1970s sex was forever to the fore and more often than not underpinned the moral panics that fitfully followed any cultural shift in youthful style and behaviour Drawing from scholarship across a range of disciplines the Subcultures Network explore how sex and sexuality were experienced presented conferred responded to and understood within the context of youth culture popular music and social change in the period between World War Two and the advent of AIDS The essays locate sex music and youth culture in the context of post war Britain with a widening and ever more prevalent media amidst the loosening bonds of censorship in a society shaped by changing patterns of consumption and the emergence of the teenager existing as Jeff Nuttall famously argued under the shadow of the nuclear bomb
