

## Pride and Prejudice: Social Class

### Introduction

Literature, as a part of art, gives pleasure, contentment, and some experiences for people who are interested in it. It appreciates more about life, because the problem of human life, society and the environment can be seen through literary works. In other words, literature gives the reader experiences through the way of artistic form. This is why literature is a vital record of what humans have seen in life, what they have experienced about it, what they have thought and felt about those aspects of it which have the most immediate and enduring interest for all of the readers.

One of the literary works is a novel. It rises as something that people may understand with the same principle in daily life. That is why the novel as a literary work reflects the social reality which is seen from social aspect, economic aspect, political aspect, science and technology aspect, cultural aspect, and religious aspect. However, our particular focus would revolve around class differences highlighted in the spectrum of social class within the novel "Pride and Prejudice".

For decades, sociologists have keenly examined social class, differences in classes, its causality and its societal impacts. Various scholars have made an attempt to provide a definition for "Class". Classes are social categories sharing subjectively-salient attributes used by people to rank those categories within a system of economic stratification. Class, in this sense of the word, would be contrasted to other forms of salient evaluation – religion, ethnicity, gender, occupation, etc. – which may have economic dimensions but which are not centrally defined in economic terms.

Class is defined in terms of material standards of living, usually indexed by income or, possibly, wealth. Class, in this agenda, is a gradational concept; the standard image is of rungs on a ladder, and the names for locations are accordingly such things as upper class, upper middle class, middle class, lower middle class, lower class, under class. Class as the relational explanation of economic life chance. Class thus becomes a relational, rather than simply gradational concept. This concept of class is characteristic of both the Weberian and Marxist traditions of social theory. Class, in this usage, is contrasted to the many other determinants of a person's life chances – for example, geographical location, forms of discrimination anchored in ascriptive characteristics

**Those Winter Sundays** Kathleen A. Welsch, 2005 This collection of memoirs examines the relationship between daughters with academic degrees and their working class parents Each contributor explores the influence that higher education has had on her relationship with her parent's as well as their influence on her academic work In writing that is akin to archeological work each writer sifts through layers of experience and draws on the lessons and language of home to consider what working class parents provide beyond food and shelter for their academically inclined child and what personal cost is exacted of parent and child in the process Their stories provoke anyone who has gone to college woman or man to consider the influence of their parents on their academic career The themes in the collection fall into five broad categories the value and power of bringing the lessons and language of working class parents into the academy the psychology of class learned from a parent the ambivalence of

love and pain associated with a parent's sacrifice and the process of becoming an academic the balancing act of straddling the worlds of academia and home and definitions of work that either complement or conflict with those learned from parents The memoirs acknowledge in retrospect how each writer's understanding of her parent's shapes her views on education and work

**Jane Austen** Laurence W. out in the making of a wide range of popular and institutional photographs Smith demonstrates that as the body was variously mapped and defined as the key to essentialized identities the image of the white middle class woman was often held up as the most complete American ideal She begins by studying gendered images of middle class domesticity to expose a transformation of feminine architectures of interiority into the essences of blood character and race She reads visual documents as well as literary texts by Nathaniel Hawthorne Pauline Hopkins and Theodore Dreiser as both indices of and forms of resistance to dominant images of gender class race and national identity Through this analysis Smith shows how the white male gaze that sought to define and constrain white women and people of color was contested and transformed over the course of the nineteenth century Smith identifies nineteenth century visual paradigms that continue to shape debates about the terms of American belonging today American Archives contributes significantly to the growing field of American visual cultural studies and it is unprecedented in explaining how practices of racialized looking and the parameters of American looks were established in the first place
