and goes beyond theories of the firm to demonstrate how local and regional society contributes in important ways to the vitality of entrepreneurs. The literature is rich with insights about leadership and culture within SMEs and the behaviours and attitudes of their founders, founding teams and managers. Since most of the attention in the entrepreneurship literature is focused on firms, we wish to explore everyone else. The social environment surrounding the entrepreneur and how leadership and culture outside the firm can have pervasive effects on the business. This book reaches across disciplinary boundaries, integrating and advancing knowledge on entrepreneurial community development. The book identifies actionable leadership strategies that can be used by literally anyone to help make a community or region a more culturally supportive, interactive home for entrepreneurial minds. We draw from original research to compare high and low entrepreneurship communities and present an emergent picture of how community level actors can or fail to work together to support entrepreneurship in places that are culturally distant from the Silicon Valley, i.e. most places. **Toward Entrepreneurial Community Development** then offers techniques for entrepreneurial community leadership, including how to build lasting alliances, create an image and harness the local culture for entrepreneurial advantage. The result is a book that provides the reader with the latest advancements and techniques in entrepreneurship development in a straight forward, readable format. No matter the reader, **Toward Entrepreneurial Community Development** demonstrates how anyone in any position can lead a local entrepreneurship movement starting anywhere, anytime.
