It does this by noting the singular strategic environment in health care, explaining the special procedures and options available to health care organizations, and providing real life examples in the form of case studies. It includes not only a description of the basic multi step process of creating and then managing a strategic plan, but also a detailed look at the role played by the key business functions: finance, marketing, human resources, information technology, and law, as well as specific strategic options: merger, acquisition, reorganization, joint venture, and some of the popular tools for analyzing strategic situations: balanced scorecard, Six Sigma, SWOT. *Healthcare Financial Management*, 2007.
