highly topical debates links between religion and violence on the one hand and the proliferation of violent urban conflicts on the other hand Their research demonstrates why cities have become so important in conflicts driven by state building fundamentalism religious nationalism and ethno religious division and illuminates the conditions under which urban environments can fuel violent conflicts while simultaneously providing opportunities for managing or transforming them This book was published as a special issue of Space and Polity

Martyrdom, Self-sacrifice, and Self-immolation Margo Kitts,2018 Suicide in the forms of martyrdom self sacrifice or self immolation is perennially controversial Should it rightly be termed suicide Does religion sanction it Should it be celebrated or anathematized At least some idealization of such self chosen deaths is found in every religious tradition treated in this volume from ascetic heroes who conquer their passions to save others by dying to righteous warriors who suffer and die valiantly while challenging the status quo At the same time there are persistent disputes about the concepts used to justify these deaths such as altruism heroism and religion itself In this volume renowned scholars bring their literary and historical expertise to bear on the contested issue of religiously sanctioned suicide Three examine contemporary movements with disputed classical roots while eleven look at classical religious literatures which variously laud and disparage figures who invite self harm to the point of death Overall the volume offers an important scholarly corrective to the axiom that religious traditions simply and always embrace life at any cost

Pluralizing Humanism Slavica Jakelić,2025-02-28 Humanism is appealed to today whenever we want to tackle the conditions of dehumanization in the contemporary world But for humanism to be viable in the twenty first century this book argues it needs to be pluralized Employing theoretical historical and sociological arguments this book moves beyond the discourse of critique It engages theories of religion and secularism as well as postmodern postcolonial and decolonial critiques of Western humanist projects to uncover the ideas and practices of religious and secular humanisms when they challenge dehumanization in the pursuit of conditions of flourishing for all Through studies of the Solidarity movement in Poland and the anti apartheid movement in South Africa the book demonstrates the centrality of humanist traditions to the emergence of religious secular solidarities that transformed the political landscapes of the world By highlighting the instances in which humanisms functioned as checks on each other s absolutist claims the book contends that humanisms supply a constructive path for addressing the challenges of our time a time of radically divided societies and intolerant even violent forms of nationalism A challenge to the critiques of humanism

that seek to identify it solely as the legacy of the West as anti religious discourse or relegate it to the domain of power constellations Pluralizing Humanism highlights the rich plurality of humanist discourses and the need for their mutual engagements It points to humanist ideals as constitutive of politics that can guide our human power because they are irreducible to it As such this book will appeal to social scientists social theorists religious studies scholars and ethicists with interests in religion secularism social movements and humanist thought and practice

Handbook of Religion and the Authority of Science Jim R. Lewis,Olav Hammer,2010-11-19 There has been a significant but little noticed aspect of the interface between science and religion namely the widespread tendency of religions to appeal to science in support of their truth claims Though the appeal to science is most evident in more recent religions like Christian Science and Scientology no major faith tradition is exempt from this pattern Members of almost every religion desire to see their truths supported by the authority of science especially in the midst of the present historical period when all of the comforting old certainties seem problematic and threatened The present collection examines this pattern in a wide variety of different religions and spiritual movements and demonstrates the many different ways in which religions appeal to the authority of science The result is a wide ranging and uniquely compelling study of how religions adapt their message to one of the major challenges presented by the contemporary world

God and Gods in the Deuteronomistic History Corrine Carvalho,John McLaughlin,2024-10-31 Like other constructs in biblical studies the Deuteronomistic History has come under scrutiny in the 21st century The books beginning with Joshua and concluding with 2 Kings were thought to be at their core a unified explication of Israel s demise in Deuteronomistic terms of sin and its consequences Current scholarship views these books as more disparate and influenced by a number of different texts not limited to Deuteronomy God and Gods in Deuteronomistic History exemplifies the latest research on these Hebrew Scriptures Each study focuses on the question of how God is disclosed in Israel s history Contributors look at the topic in a single book to bring forth the richness and variety of the Deity s descriptions The results show an array of understandings about the divine figure Yhwh whose titles also include El El the Living and Yhwh God in heaven to name but a few A strength of this volume is the meticulous analysis of Mesopotamian and West Semitic sources expressed both textually and in material culture The biblical writers adopted and adapted these ancient Near Eastern sources to create various pictures of God in the Deuteronomistic History at times mirroring the deities of the so called idolatrous religions This book brings forth portrayals of Israel s God as well as other regional deities in their contiguity and complexity across the Deuteronomistic History

Religion and Violence David A. Bernat,Jonathan Klawans,2007 Violence that is motivated by and justified by religious ideas authorities and texts is everywhere around us Some say that the origins of religion and human violence are inherently connected and that the explanation for religious violence lies at the heart of the religious imagination itself others that human violence was there long before religion ever came about being no more than an unfortunate by product of human evolution Reconsidering the question of religion and violence in the biblical heritage is a

narrower but nonetheless essential endeavour to which the present volume addresses itself After an introductory chapter by the editors on religion violence and the Bible Ziony Zevit writes on violence in Israelite culture and in the Bible Tamar Kamionkowski on violence in prophetic literature Stephen Geller on the prophetic roots of religious violence David Wright on homicide talion and vengeance in the Covenant Code Lawrence Wills on the death of the hero and the violent death of Jesus Jennifer Wright Knust on sacrifice and sacred text in Justin and David Frankfurter on vengeance fantasies in the New Testament Stephen Marini offers concluding reflections on religion and violence under the rubric of conflict subversion and sacrifice

Extreme Religious Behaviours Johannes Bronkhorst, 2024-06-17 Certain religious behaviours clearly reduce biological fitness These behaviours include celibacy along with various forms of asceticism and rituals that harm the performer Such behaviours are found in widely different cultures How is this possible This book shows that these behaviours as is religion in general are by products of features of the human mind whose evolutionary fitness is beyond doubt and explores those features Which are those features This book proposes a twofold answer It draws attention to the layered nature of human consciousness in which different manners of experience are superimposed on each other This goes a long way toward accounting for the universal religious belief in some kind of transcendental world a higher reality different from ordinary reality The layering of consciousness comes about in childhood and gains in prominence with the acquisition of a first language which is the second feature highlighted in this book Together these features explain a variety of normal religious behaviours and beliefs and account for the possibility of mystical experience They also explain the occurrence of behaviours that do not augment evolutionary fitness

Divine Violence and the Christus Victor Atonement Model Martyn J. Smith, 2016-09-23 In this book Martyn Smith addresses the issue of God's violence and refuses to shy away from difficult and controversial conclusions Through his wide ranging and measured study he reflects upon God and violence in both biblical and theological contexts assessing the implications of divine violence for understanding and engaging with God's nature and character Jesus too through his dramatic actions in the temple is presented as one capable of exhibiting a surprising degree of violent behavior in the furtherance of God's purposes Through a reappropriation of the ancient Christus Victor model of atonement with its dramatic representation of God's war with the Satan Smith proposes that Christian understanding of both God and salvation has to return to its long neglected past in order to move forward both biblically and dynamically into the future
