

# ACCOUNTING PRINCIPLES

By Bojan Radojicic

## RELEVANCE

Financial information should be relevant to the decision-making needs of users. It should have predictive value, confirmatory value, or both.

## FAITHFUL REPRESENTATION

Financial information should faithfully represent the economic phenomena it purports to represent. It should be complete, neutral, and free from error.

## SUBSTANCE OVER FORM

Transactions and events should be accounted for and presented in accordance with their substance and economic reality, rather than merely their legal form.

## PRUDENCE

When uncertainty exists, caution should be exercised in the recognition and measurement of assets, liabilities. Anticipated losses should be recognized immediately, while gains should be recognized only when realized.

## COMPARABILITY

Financial information should be presented in a manner that enables users to compare it with information from other entities and across different periods.

## UNDERSTABILITY

Financial information should be presented in a clear and concise manner, making it understandable to users with reasonable knowledge of business and economic activities.

## TIMELINESS

Financial information should be available to users in a timely manner, allowing them to make informed decisions.

## VERIFABILITY

Financial information should be capable of being verified or corroborated by independent and knowledgeable parties.

## GOING CONCERN

Unless there is evidence to the contrary, it is assumed that the entity will continue to operate for the foreseeable future. Financial statements are prepared on a going concern basis.

## MATERIALITY

Financial information should be material if omitting or misstating it could influence the decisions of users. Materiality depends on the nature and magnitude of the item or information.

### **Creating The "Big Mess": A Marxist History Of American Accounting Theory, C.1900-1929** Rob Bryer,2021-07-15

Creating the Big Mess and its sequel Accounting for Crises use Marx's theory of capitalism to explain why there is no generally accepted theory of financial accounting and explore the consequences by studying the history of American accounting theory from c 1900 to 2007 The answer Creating the Big Mess is first that while late 19th century British accounting principles founded on the going concern concept provided an objective basis for holding management accountable to shareholders for its stewardship of capital and were accepted by the nascent American profession they are inchoate Second Irving Fisher's economic theory of accounting based on the assertion that present value is the accountants measurement ideal which is subjective framed early 20th century American accounting theory which undermined British principles making them incoherent In an unregulated pro business environment leading theorists particularly Henry Rand Hatfield and William A Paton Jr became authorities for management discretion creating the big mess Hatfield saw in late 1920s American accounting Accounting for Crises examines the roles of Fisher's theory in promoting the speculation leading to the 1929 Great Crash aggravating the Great Depression hindering accounting regulation from the 1930s producing the Financial Accounting Standard Board's conceptual framework and facilitating the 2007 2008 Global Financial Crisis

Kimmel,2006-04-01 *Evolution of Corporate Financial Reporting (RLE Accounting)* T. Lee,Robert Parker,2014-02-05 This book explores certain contemporary problems of accounting through the eyes and pens of historians Many accounting problems are not new ones and it is therefore important to understand their history and development through the ages This book places twentieth century studies in context and provides clues to possible solutions The focus of this book is on companies and their financial reports and will be of use to students of economic and business history who wish to provide themselves with an accounting background in relation to the financial reports of companies they may be studying **Records and Briefs of the United States Supreme Court** ,1973

**Economics, Accounting and the True Nature of Capitalism** Jacques Richard,Alexandre Rambaud,2021-11-29 Almost all economists whether classical neoclassical or Marxist have failed in their analyses of capitalism to consider the underpinning systems of accounting This book draws attention to this lacuna focusing specifically on the concept of capital a major concept that dominates all teaching and practice in both economics and management It is argued that while for the practitioners of capitalism in accounting and business the capital in their accounts is a debt to be repaid or a thing to be kept for economists it has been considered a means or even a resource or an asset intended to be worn out This category error has led to economists failing to comprehend the true nature of capitalism On this basis this book proposes a new definition of

capitalism that brings about considerable changes in the attitude to be had towards this economic system in particular the means to bring about its replacement This book will be of significant interest to readers of political economy history of economic thought critical accounting and heterodox economics      **Accounting Theory** William Andrew Paton,1922
