## **Principles of Healthcare**

### **Reimbursement, Chp 1, Part 1 Questions**

### **and Correct Answers**

The US healthcare system is inherently complex because ☒ it is actually multiple subsystems rather than a single system

Insurance ☒ a system of reducing a person's exposure to risk of loss by having another party (insurance company or insurer) assume the risk

Risk pool ☒ group of persons with similar risks of loss

Risk ☒ In healthcare, is the potential that a person will get sick or require health services and will incur bills (costs) associated with his or her treatment or services.

Dependent/family coverage ☒ Health insurance for spouses, children, or both

Reimbursement ☒ being repaid or compensated for expenses already incurred or, as in the case of health-care, for services that have already been provided (physicians and clinics must seek to be paid back for services that they have already provided)

Party ☒ an entity that receives, renders, or pays for health services

First party ☒ is the patient himself or herself or the person, such as a parent, responsible for the patient's health bill

Second party ☒ the physician, clinic, hospital, nursing home, or other healthcare entity rendering the care. These second parties are often called providers because they provide healthcare

Third party ☒ the payer, an uninvolved insurance company or health agency that pays the physician, clinic, or other second-party provider for the care or services rendered to the first party (patient)  
Examples of third-party payers are health insurance companies, workers' compensation, and Medicare.

Unit of payment ☒ Element that is the basis of payment; ranges in aggregation from single service such as a laboratory test, to an entire clinic visit. To an episode of care, to hospitalization, and finally, to an entire population.

Time orientation ☒ is retrospective versus prospective
