

## 7110 GCE O LEVEL PRINCIPLES OF ACCOUNTS STANDARDS BOOKLET

### INTRODUCTION

---

This booklet contains answers written by ordinary level candidates in the June 2008 Principles of Accounts examination. The answers have been selected to demonstrate both strengths and weaknesses in the candidates responses.

The examination question paper and the mark scheme used by the examiners are given as appendices, together with the Principal Examiner's report.

Each question will be analysed in detail explaining the responses required to each part, and these will be illustrated with the answers of two candidates. One example will be that of an A grade candidate and the other an example of a C grade candidate. Comments will be given on each response, to indicate where marks were awarded, why marks were lost, and how additional marks could have been obtained. Reference will also be made to the Principal Examiner's report and, where appropriate, teaching strategies will be suggested.

### 7110 PAPER 2

---

This is a structured written paper of two hours length, with five or six compulsory questions drawn from topics across the whole syllabus. The final question in the paper carries one third of the total marks, and consists of the preparation of a full final accounts, including either a manufacturing account or partnership accounts.

The three objectives assessed in the paper are:

- |   |                              |       |
|---|------------------------------|-------|
| A | Knowledge with understanding | (25%) |
| B | Analysis                     | (55%) |
| C | Evaluation                   | (20%) |

- A – Knowledge with understanding requires candidates to demonstrate by numeracy and literacy their knowledge of accounting terms and principles.
- B – Analysis requires candidates to select and order financial information in appropriate accounting format.
- C – Evaluation requires reasoned conclusions to be drawn from financial information.

### STUDY SKILLS

---

Eighty per cent of the total marks are awarded for knowledge of accounting procedures and terminology and the ability to put accounting information into a prescribed format.

Candidates should have a copy of at least one recognised textbook for the specification. It is also recommended that they have a selection of recent past papers – four at minimum. As the subject is cumulative, candidates should be learning to answer parts of examination questions as soon as a topic is completed. This can be done early in the course with questions on day books (journals) and double entry. This ensures that candidates will be familiar with the examination paper and be practicing answering examination questions at the same time.

Twenty per cent of the total marks are awarded for evaluation, and it is this area which often proves to be the weakest in candidates' scripts. Usually this skill is assessed by ratio analysis and many candidates are unable to explain the causes or changes in the ratios or to make comparisons between calculated ratios. Also it is not unusual for the evaluation part of a question to be left unanswered. This may be because candidates have not been encouraged to learn the skill of evaluation, as tutors concentrate on the other skills in the paper. With this approach it is highly unlikely that candidates will gain higher grades.
