Committee on Labor and Human Resources, 1988 **The New Educator's Library: The teaching of geography and economics** , 1921 Macroeconomic Analysis in the Classical Tradition James C W Ahiakpor, 2021-03-23 Macroeconomic Analysis in the Classical Tradition explains how the influence of Keynes's macroeconomics including his changed definitions of some key macroeconomic concepts has impeded many analysts' ability to readily resolve disputes in modern macroeconomics Expanding on his earlier work Macroeconomics without the Errors of Keynes 2019 the author delves into more aspects of macroeconomic theory and argues for a revision of Keynes's contribution to the field Attention is given to

theories and concepts such as Say's Law, the quantity theory of money, the liquidity trap, the permanent income hypothesis, 100% money, and the Phillips curve analysis. The chapters work to build a careful critique of Keynes's economics and make the case that the classical macroeconomics of Smith, Say, Ricardo, Mill, and others could help resolve present-day policy disagreements and redefine macroeconomic priorities. This book provides essential reading for advanced students and scholars with an interest in the foundations of Keynes's theories and current debates within macroeconomic policy.

Power and Influence of Economists Jens Maesse, Stephan Pühringer, Thierry Rossier, Pierre Benz, 2021-05-23

Economists occupy leading positions in many different sectors including central and private banks, multinational corporations, the state, and the media, as well as serving as policy consultants on everything from health to the environment and security. *Power and Influence of Economists* explores the interconnected relationship between power, knowledge, and influence, which has led economics to be both a source and beneficiary of widespread power and influence. The contributors to this book explore the complex and diverse methods and channels that economists have used to exert and expand their influence from different disciplinary and national perspectives. Four different analytical views on the role of power and economics are taken: first, the role of economic expert discourses as power devices for the formation of influential expertise; second, the logics and modalities of governmentality that produce power-knowledge apparatuses between science and society; third, economists as involved in networks between academia, politics, and the media; and fourth, economics considered as a social field including questions of legitimacy and unequal relations between economists based on the detention of various capitals. The volume includes case studies on a variety of national configurations of economics, such as the US, Germany, Italy, Switzerland, Greece, Mexico, and Brazil, as well as international spaces and organisations such as the IMF. This book provides innovative research perspectives for students and scholars of heterodox economics, cultural political economy, sociology of professions, network studies, and the social studies of power, discourse, and knowledge. The contributors to this volume seek further understanding of the microfoundations of economic growth. It focuses on three subjects that interested the great Austrian and Harvard economist Joseph A. Schumpeter: innovation, technological change, and economic growth. The first part of the volume treats institutions, markets, and entrepreneurs without which analysis of the firm makes little or no sense. The second part focuses on the firm as innovator, placing heavy emphasis on the role of knowledge formation. The subjects of innovation and knowledge formation are approached from three perspectives.

theoretical industry case studies and empirical cross section and panel data analysis In the third part of the book the action moves from the firm to the macro or economy wide level The volume s unique feature is combining institutions the innovative behavior of firms and an intuitively dynamic macroeconomic analysis all from a Schumpeterian perspective It is argued that the study of micro institutions such as firms and the evolving nature of markets are necessary ingredients to understanding macro oriented phenomena such as economic growth It is in this sense then that the book is concerned with microfoundations Contributors are Daniele Archibugi Spyros Arvanitis David B Audretsch John R Baldwin Gerard Ballot Pontus Braunerhjelm Dagobert L Brito Uwe Cantner Bo Carlsson Robert W Clower Richard Day Rinaldo Evangelista Jan Glete Horst Hanusch Heinz Hollenstein Michael D Intriligator George Johnson Joanne Johnson Aija Leiponen Staffan Laestadius Richard N Langlois Frank M Machovec Maureen McKelvey Valentina Meiciani Douglass C North Giulio Perani Andreas Pyka Fabio Rapiti Roberto Simonetti Frank Stafford Paula E Stephan Erol Taymaz Clas Wihlborg Erica R Worth and S Y Wu Gunnar K Eliasson is Professor of Industrial Economics Royal Technical Institute KTH Stockholm Christopher Green is Professor of Economics McGill University Charles R McCann Jr is Research Associate Department of Economics University of Pittsburgh **A.L.A.
