This third edition delivers several new features adding to its value as the only timely and relevant text written for the full spectrum of RN to BSN, BSN and MSN students. It has been significantly revised to simplify content to address the vast changes in and increasing complexity of U.S. health care financing and to be useful in both traditional in-class format and hybrid and online programs. Two new and refocused chapters address assessing financial health and nurse entrepreneurship and practice management and new material illuminates recent research findings and statistics. Chapters feature worksheets such as business plan checklists and text boxes expanding on key chapter content. The book is distinguished by its provision of case examples based on nurse-run clinic and inpatient nursing unit financial issues. It provides multiple opportunities for experiential learning such as writing business plans and health program grant proposals. It delivers cost-benefit and cost-effectiveness analyses, discusses budget preparation, offers strategies for controlling budget costs, and updates relevant health policies and statistics. The text's engaging format promotes the synthesis of economics and finance across the nursing curriculum through the use of end-of-chapter exercises, discussion questions, and games based on concepts within the text. Additionally, tips throughout the book alert students about the need to apply concepts from other aspects of their education to economic and financial situations. Also included are online supplemental materials for teachers and students including Excel spreadsheets, grant proposals, a test bank, and PowerPoint slides.
