The Journal of Industrial and Engineering Chemistry ,1920 **Journal of Industrial and Engineering Chemistry** ,1919 **Pharmaceutical Suspensions** Alok K. Kulshreshtha, Onkar N. Singh, G. Michael Wall, 2009-11-05 The suspension dosage form has long been used for poorly soluble active ingredients for various therapeutic indications. Development of stable suspensions over the shelf life of the drug product continues to be a challenge on many fronts. A good understanding of the fundamentals of disperse systems is essential in the development of a suitable pharmaceutical suspension. The development of a suspension dosage form follows a very complicated path. The selection of the proper excipients, surfactants, viscosity imparting agents etc. is important. The particle size distribution in the finished drug product dosage form is a critical parameter that significantly impacts the bioavailability and pharmacokinetics of the product. Appropriate analytical methodologies and instruments, chromatographs, viscometers, particle size analyzers etc. must be utilized to properly characterize the suspension formulation. The development process continues with a successful scale up of the manufacturing process. Regulatory agencies around the world require clinical trials to establish the safety and efficacy of the drug product. All of this development work should culminate into a regulatory filing in accordance with the regulatory guidelines. **Pharmaceutical Suspensions: From Formulation Development to Manufacturing** in its organization follows the development approach used widely in the pharmaceutical industry. The primary focus of this book is on the classical disperse system: poorly soluble active pharmaceutical ingredients suspended in a suitable vehicle. *Handbook of Industrial Drying, Second Edition, Revised and Expanded* A. The organizers have broadened the boundaries of Process Systems Engineering by inviting contributions at different scales of modeling and demonstrating vertical and horizontal integration. Contributions range from applications at the molecular level to the strategic level of the supply chain and sustainable development. They cover major classical themes at the same time exploring a new range of applications that address the production of renewable forms of energy, environmental footprints and sustainable use of resources and water. *Journal of the Royal Institute of Chemistry* Royal Institute of Chemistry, 1914 Value and Distribution Herbert Joseph Davenport, 1907 **Modern Library Technologies**
