subjects is based in part by the questions that came to the author over the years but even more by the preference of the author himself In this respect it is a personal book Thus it should be stressed that the book is not a handbook or even a textbook many subjects that commonly are treated in such books are not included here Not because they lack importance but because the author feels that they are adequately treated elsewhere Some relevant works are mentioned in the References Over the years the author has been engaged in giving courses on vision and lighting lately more in particular on Masterclasses on a post graduate or post doctorate level
