BRAC is by many measures the largest nongovernmental organization in the world and by many accounts the most effective anti poverty program ever BRAC seems to stand apart from countless failed development ventures Its scale is massive with 100 000 employees reaching more than 100 million people in Asia and Africa In Bangladesh where it began Abed s work gave rise to some of the biggest gains in the basic condition of people s lives ever seen anywhere according to The Economist His methods changed the way global policymakers think about poverty By the time of his death at eighty three in December 2019 he was revered in international development circles Yet among the wider public he remained largely unknown His story has never been told until now Abed avoided the limelight He thought his own story was of little consequence compared to the millions of women who rose from poverty with BRAC s help bending the arc of history through their own tenacity and grit The challenges he faced often seemed insurmountable Abed s personal life was a tapestry of love and grief a lover s suicide a wife who died in his arms He was a taciturn man with a short temper that erupted on rare occasions Many of his ventures failed but Abed persevered This book is also the biography of an idea the idea that hope itself has the power to overcome poverty For too long people thought poverty was something ordained by a higher power as immutable as the sun and the moon Abed wrote in 2018 His life s mission was to put that myth to rest This is the story of a man who lived a life of complexity blemishes and all driven by the conviction that in the dominion of human lives hope will ultimately triumph over fate
